CE marking is a certification mark that indicates conformity with health, safety, and

environmental protection standards for products sold within the European Economic

Area (EEA). The CE marking is also found on products sold outside the EEA that have

been manufactured to EEA standards. This makes the CE marking recognizable

worldwide even to people who are not familiar with the European Economic Area.

WEEE is waste electrical and electronic equipment. It is end-of-life electrical and electronic equipment and covers virtually everything with a plug or battery. ...

The EC introduced the WEEE Directive in 2002 to address the environmental impacts of unwanted electrical and electronic equipment at end-of-life disposal.
