

2 Port 10/100Mbps SOHO Switch

Key Features

- Comply with the IEEE802.3 Ethernet and IEEE 802.3u Fast Ethernet standard
- 10/100Mbps N-Way auto-negotiation ports/100Mbps Fiber (ST,SC) ports
- Store and Forward switching architecture
- Total bandwidth up to 200Mbps
- Half/full duplex transmission mode provided
- Routing decision less than 0.5us
- Total 4K MAC address supported per port
- Filtering and forwarding rate 148,800 packets per second for 100Mbps
- 170 full-size data packet buffer
- Compact size design for desktop
- External power supply is provided
- LED indicators array for simple diagnostics and management

2 Port 10/100Mbps SOHO Switch

The LevelOne 2 port 10/100Mbps SOHO Switch series comply with the IEEE 802.3 and 802.3u standards and provides a flexible choice of media interfaces to satisfy your network needs

The switch series are based on the high-performance store and forward switching architecture.

They support filtering and forwarding rates up to 148,800 packets per second for 100Mbps. 2 crossover slide switches for each port as well as half/full duplex transmission mode is provided.

With a compact design, flexible media choices, and outstanding features, the LevelOne 2 port 10/100Mbps SOHO Switch series offer a simple, easy and cost-effective method for extending your SOHO Fast Ethernet networks.

100Mbps Fast Ethernet Fiber Converter

Key Features

- Comply with 802.3u 100BaseTX and 100BaseFX standard
- Interoperable with other 100BaseTX/FX hubs or switches
- Choice of multi-mode ST or SC fiber optic connection
- Provides status LEDs for easily monitoring network activity
- Extends network span for up to 2KM
- Ideal connectivity solution for networks using a combination of UTP and fiber optic media types
- Auto-detection of half/full duplex mode

100Mbps Fast Ethernet Fiber Converter

The LevelOne FTC-0100TFX/FTC0101TFX series are 100BaseTX to 100BaseFX converters. They are the Fast Ethernet media converter that converts 100BaseTX RJ-45 jack to either 100BaseFX ST or SC fiber optic connector. The converters can be operated in either half or full duplex mode between any two 100Base networking devices. It protects the existing investment by providing both cabling flexibility and network distance flexibility. The LevelOne FTC-0100TFX/FTC0101TFX series are ideal solution to interconnect networks on different floors, to connect separate buildings and to extend distances between servers and workgroups up to maximum 2KM and 200Mbps.

100Mbps Fast Ethernet Fiber Adapter

The LevelOne FNC-0103FX/FNC-0104FX series are 100Mbps Fast Ethernet Fiber Adapters. They fully comply with IEEE802.3u standard and support full/half duplex mode. Designed with DEC Fast

Ethernet LAN controller these adapters use Bus-mastering DMA approach to optimize throughput while maintaining low CPU utilization. A Fiber Optic Backbone can be established by using FNC-0103FX or FNC-0104FX on the server or workstation for 100Mbps operation with multi-mode fiber optic cable. The node to node network distance can be up to 2KM in full-duplex operation.

Diagnostic LEDs for maintenance purposes are provided. Extensive NOS drivers are available.

NetWare, Windows NT, Windows95/98, Windows for Workgroups, Microsoft LAN Manager, OS/2 warp, IBM LAN Server, DEC Pathworks, Banyan Vines, Lantastic/AI and SCO Unix.

8 Port 10/100Mbps NWay Switch

Key Features

- 8 10/100BaseTX auto-negotiation ports
- Cut-through and store and forward algorithm selectable, both fragment free
- Forwarding rate 148800 packets/s for 100Mbps and 14880 packets/s for 10Mbps
- Integrated switching power supply
- Watch-dog timer protection
- Non-Blocking architecture using sync. SRAM
- One shared Up-link port and one shared MII port for flexible backbone integration.
- Vacuum Fluorescent Display (VFD) for status control and configuration.

■
FSW-0803TX
8 Port 10/100Mbps
OfficeCon NWay Switch

Let the

8 Port 10/100Mbps NWay Switch

The LevelOne Switch FSW-0803TX is an auto-negotiation NWay Switch. It complies with IEEE802.3, 10BaseT Ethernet and IEEE802.3u 100BaseTX Fast Ethernet Standard.

The Switch offers 8 port 100BaseTX and 10BaseT auto-negotiation (RJ45) ports, located in the front panel. Port 1 is shared with one MDI-II up-link port and one external MII port is shared with port 5 accessible from the rear panel to provide optimal connectivity.

The performance of the LevelOne Switch FSW-0803TX is based on a 1MB packet buffer per port and 8 K of MAC addresses that can be learned and a fully non-blocking architecture using Sync SRAM (SSRAM). The Switch contains a broadcast-storm protection, loop-isolation, fragment-free Cut-through and fast Store-and-Forward with auto-detection and selection.

The configuration data is held in a nonvolatile storage.

In addition an integrated watch-dog timer and a power-on self-test stands for optimal reliability. The

Smart Mini-Console Operation manages traffic utilization/collision statistics and the port statistic counter display. The port setting and the port status display offers a range of functions as fixed speed, full/half duplex, enable/disable, cut-through/store-forward, buffer control and on/off. The unit configuration offers the selection of storm detection enable/disable, loop isolation enable/disable, set password, console lock enable, system restart, factory restart and a system information display. The FSW-0803TX is ideal for backbone switching applications in LAN-environments.

work

5/8 Port 10/100Mbps SOHO NWay Switch

The LevelOne Switch FSW-0505/0805TX is a SOHO auto-negotiation N-Way switching. It complies with IEEE802.3, 10BaseT Ethernet and IEEE802.3u 100BaseTX Fast Ethernet Standard. The Switch offers 5/8 port 100BaseTX and 10BaseT auto-negotiation (RJ45) ports.

LevelOne Switch FSW-0505/0805TX is the typical for a real switch in full-duplex capability on all ports as already implemented in all LevelOne LAN Adapters. This intelligent SOHO device learns which stations are connected to which port (MAC address table) and connect (Switch) the two communicating ports dynamically during the Ethernet packet transmission offering full bandwidth on all ports.

Normal stations can connect directly to the switch in full-duplex mode or a normal hub can be connected for sub-distribution in half-duplex mode. Through Auto-Sensing feature on all ports the FSW-0505/0805TX adjusts all ports-setting automatically.

The LevelOne FHU-0505/0805/1605TXDS 5/8/16 Port SOHO 10/100Mbps Dual Speed Hub are comply with IEEE802.3, 10BaseT and IEEE802.3u, 100BaseTX standard. Users can easily expand their Fast Ethernet port count to create larger workgroups effortlessly.

With the cascade cable, users can stack up to 2 units with one stack connector provided at the rear panel without sacrificing ports. Internal switch bridging function can link 10BaseT segment to 100BaseTX segments. At the front panel, one additional RJ45 up-link port can be cascaded to a hub by using straight-through cable.

These product series can stack each other, i.e. any combination of 5/8/16 port dual-speed hubs area allowed. Diagnostic LED indicators provide an easy way to monitor the status of your workgroup. With its compact design, it is a fast, easy, expandable and cost-effective solution for SOHO Dual-Speed Ethernet network.

16/24 Port 10/100Mbps NWay Switch

The LevelOne Switch FSW-1604/2404TFX series are auto-negotiation NWay Switches. They are compliant with IEEE802.3 10BaseT Ethernet and IEEE802.3u 100BaseTX Fast Ethernet Standard.

The Switches offer 16/24 port 100BaseTX and 10BaseT auto-negotiation (RJ45) ports, located in the front panel. Port 12 (FSW-1604TFX), Port 24 (FSW-2404TFX) is optional for MDI and MDI-X mode changing by a push button. There is slot built in on real panel. Fiber (ST,SC) module is available for distance extension. Full duplex switching design will provide max. 2KM.

The performance of the LevelOne Switch FSW-1604/2404TFX series are based on 1024(FSW-1604TFX)/1536(FSW-2404TFX) full packet buffer and total 2K(FSW-1604TFX)/3K(FSW-2404TFX) of MAC addresses that can be learned and a fully non-blocking architecture. The Switches contain a broadcast-storm control, IEEE802.3x compliant full-duplex flow control, Half-duplex flow control, Store-and-Forward with wire-speed filtering and forwarding rates.

Multi-Port 100Mbps Stackable Ethernet Hub

The LevelOne FHU-1603/2403/3203TXS 100Mbps Stackable Ethernet Hub are smart and cost effective 100Mbps Fast Ethernet hubs. These products are built around a standard 19-inch chassis. They are allowed stand alone or rack mounted operation.

The LevelOne FHU-1603/2403/3203TXS series are economical Fast Ethernet hubs can be stacked up to 3 units. An up-link port is built into the hubs to utilize standard straight-through cable to up-link two hubs. Those products are the total solution for high-bandwidth applications that require performance beyond 10Mbps Ethernet speed. They provided a cost effective migration path to 100Mbps technology.

They are part of an integrated 100Mbps Fast Ethernet solution. In addition, with the built in slot provided, 10/100Mbps TX NWay switch module for 10BaseT and 100BaseTX flexibility, 100BaseFX (ST,SC) switch module for 2M distance extension, and also BNC switch module for RG58 cabling requirement.

The LevelOne FHU-1603/2403/3203TXS series are complied with IEEE 802.3u standard. This series are easy to install. Just plug in the power cord and connect up to 16/24/32 workstations or servers respectively. The build in LEDs monitor operation, individual link/activity and partition LEDs to make users easily monitor the traffic status at first glance.

Multi-Port 10/100Mbps Stackable Dual-Speed Hub

The LevelOne FHU-1604/2404/3204TXDS series are the dual-speed hubs designed to provide fast transmission speed, high performance and unmatched flexibility for LAN workgroup environments. 100Mbps segment provides high-speed access to backbone and servers. They eliminate the 10Mbps bottleneck to servers and shared resources and allow the efficient use of powerful servers.

Internal bridge provided the communication ability in between 10Mbps segment and 100Mbps segment. The 16/24/32 auto-sensing ports are allowed to flexible set-up and high performance for 10BaseT and 100BaseTX. The LevelOne FHU-1604/2404/3204TXS series are economical dual-speed hub series can be stacked up to 3 units. An up-link port is built into the hubs to utilize standard straight-through cable to up-link two hubs. In addition, with the built in slot provided, 10/100Mbps TX NWay switch module for 10BaseT and 100BaseTX flexibility, 100BaseFX (ST,SC) switch module for 2M distance extension, and also BNC switch module for RG58 cabling requirement.

The LevelOne FHU-1604/2404/3204TXS complied with IEEE 802.3 and IEEE802.3u standards. This series are easy to install. Just plug in the power cord and connect up to 16/24/32 workstations or servers respectively. The built in LEDs monitor operation, individual link/activity and partition LEDs to make users easily monitor the traffic status at first glance.

Product Specifications

Communication	<ul style="list-style-type: none"> IEEE802.3 and IEEE802.3u 100Base-TX Class II standard
Network Interface	<ul style="list-style-type: none"> Hub: STP RJ45 port for 10Mbps or 100Mbps Optional module: 100BaseFX (ST,SC) connector (MDU-0117FXT/0118FXC) 10/100BaseTX RJ45 port, BNC RG58 port
LED indicators	<ul style="list-style-type: none"> System - power and collision LEDs Individual port - link/activity and partition LEDs
Dimensions	<ul style="list-style-type: none"> 220mm(W) x 430mm(L) x 44mm(H)
Temperature	<ul style="list-style-type: none"> Operating: 0 to 50°C Storage: -20 to 70°C
Humidity	<ul style="list-style-type: none"> Operating - 10% to 90% RH Storage - 5% to 90% RH
Certification	<ul style="list-style-type: none"> FCC Part 15 Class A, CE
Power	<ul style="list-style-type: none"> 100-240 VAC, 50/60 Hz Internal universal power supply
