

2-port KVM Switch for PS/2

The LevelOne Desktop KVM, KVM-0205 is a computer switch that allows access to two IBM compatible computers respectively from one PS/2 keyboard, mouse and monitor. Switching between computers is as easy as pressing the push button or entering hot-key commands from your keyboard.

Compatible with the most popular Hardware/Software--KVM-0201 support wide range of PC hardware and software platform and have complete keyboard and mouse emulation for simultaneous PCs boot-up process. This device supports all major Network Operating Systems (NOS) including Windows™ 98/ 98SE/ ME/ XP/ 2000/NT, Netware and Unix/ Linux.

Easy to Install and monitor-- There is no interface card and software to install and the LevelOne Desktop KVM is independent of the computer operating system. By allowing one console to manage all your computers, the LevelOne Desktop KVM eliminates the expense for extra consoles, the spaces for extra peripherals and the time hopping around for accessing different computers.
