

Smart Mobile USB Flash drive

The LevelOne 1 Gigabyte MUS-1001 USB 2.0 Smart Flash Drive securely backs-up and synchronizes emails, address book, favourite Website addresses, and data and music files in one single action.

One-Touch Backup and Synchronize

The LevelOne MUS-1001 smart flash drive quickly stores and synchronizes data or play music files in one single action by using the smart "One-Button" feature.

Emails and address books saved in Outlook Express, favourites stored with Internet Explorer and the My Documents folder are automatically stored when pressing the quick back-up button.

Auto-Play of Music Files

Once audio files have been uploaded, the MUS-1001 creates a self-built play-list that is fully compatible with Windows Media Player. Files are directly played from the flash drive without the need to download them onto a hard drive.

Mobile Storage

The mobility of the MUS-1001 makes it the best solution to keep data between different computers up-to-date or to carry important information with you securely and conveniently.

The Smart Mobile Storage device supports automatic backup and restoring of Outlook Express e-mails and address book, the Internet Explorer's favourites folder as well as the My Documents folder in Microsoft Windows. Further, the high speed compatible USB 2.0 1 Gigabit flash drive can backup, restore and synchronize large data files in less than 5 minutes.

Secured Private Flash drive

The MUS-1001 offers a powerful 128 bit key data encryption feature that secures the disk with username/password protection. Data is securely uploaded to the flash drive without the fear that, if the drive is lost, unauthorized access is gained to sensitive data.

Quick Installation

The MUS-1001 is easy to use and supports an array of languages in a friendly user interface. With Plug-and-Play support, no additional software installation is necessary. Microsoft operating system automatically finds and installs the flash drive and an additional USB drive.

MUS-1001
