

MIMO Antenna Stand

LevelOne provides an ideal extension specifically designed for MIMO network adapters.

The SAN-3000 has 3 antenna plugs and a cord extension that connects the stand to the MIMO adapter. This stand provides better coverage for computers that are located in "dead-spots" in the office or where the wireless network has difficulty reaching the adaptor, for example computers placed under a desk.

SAN-3000

Key Features

- Provide extension capability for computers that have difficulty connecting to a wireless MIMO network
- Compatible with all MIMO network adaptor cards, Broadband routers and Access Points
- Provides 3 antenna attach ports
- SMA Plug reverse for quick plugging without the need to screw and unscrew extensions and antennas

Technical Specification

Electrical Properties

- **Frequency Range**
2.4GHz – 2.5GHz

Physical Properties

- **Cable**
1.5m RG-174 Coaxial Cable
- **Antenna Cover**
TPE
- **Antenna Base**
PC
- **MIMO Housing**
ABS
- **Operating Temp**
-20 °C – 65 °C
- **Storage Temp**
-30 °C – 75 °C
- **Antenna Color**
Black
- **Housing Color**
Black
- **Connector**
SMA Plug Reverse
- **Antenna Port**
SMA Jack Reverse for quick plugging
