The VDS-0110 and VDS-0111, a line power pair of VDSL2 (Very high-bit-rate Digital Subscriber Line) converters, providing a broadband transmission up to 100/60Mbps downstream/upstream data rate over single pair copper line for point-to-point Ethernet connectivity. With 100/60Mbps data rate, VDS-0110/-0111 supports transmission distance up to 350m for line power connections.

The line power is supplied from the VDS-0110 to VDS-0111 and conforms to the Safety-Extra-Low-Voltage (SELV) standards. With plug-and-play features and minimum installation time, VDS-0110 is always configured as master mode for central side, and VDS-0111 as slave mode for remote side.

The VDS-0110/-0111 conforms to the ITU-T G.993.1 and G.993.2 to meet VDSL/VDSL2 and SG15Q4 DMT for network requirements. A pair of VDS-0110/-0111 offers a cost effective line power solution for bandwidth-hungry applications such as LAN-to-LAN connectivity, Video Streaming, FTTB, and MDU/MTU over single twisted pair telephone line.
