HDD Installation

1. Start by removing the screws on the side.

2. Push the top housing forward then lift it up.

3. Install HDD on brackets with screws

Prepare HDD brackets.

Fix the HDD on bracket with screws. You can install two HDDs with brackets.

4.Install SATA Cable

Prepare SATA cable.

Install SATA cables on system,
install SATA data cable.

Install power cable.

Install SATA cable on the HDD.

Install HDD brackets

Fix HDD brackets on system with screws.

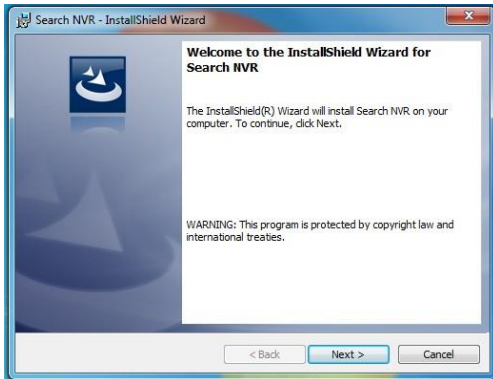

Connect to the NVR

There are various ways you can connect to the NVR and below are the suggested methods for different network setup:

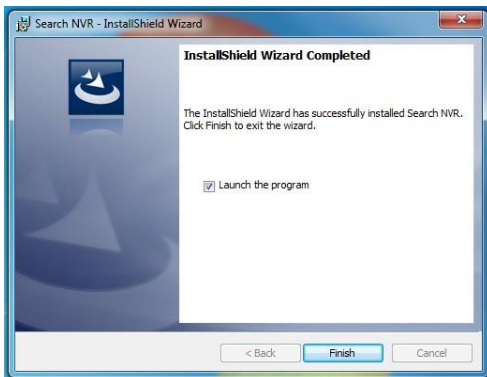

Use LevelOne Device Search Utility

If the NVR is placed in a corporate network or a local area network where a DHCP server is already presented, run the “**LevelOne Device Search**” utility from a computer that is on the same network and locate the NVR with its IP address that is assigned by the top-level DHCP server.

To begin, launch the “Device Search” utility from the CD and proceed with the installation:

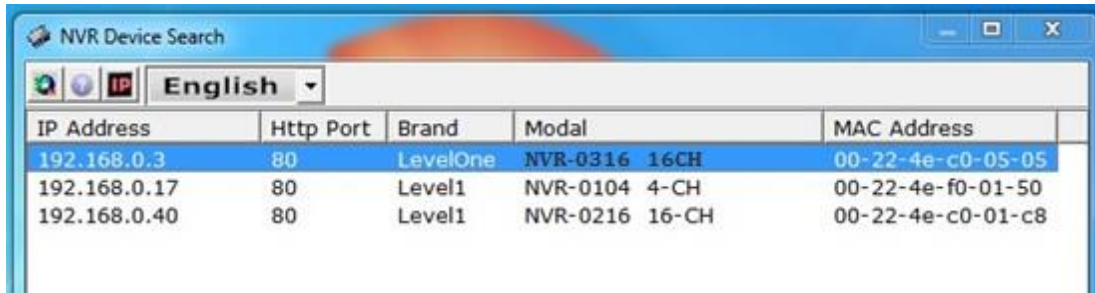

Once the installation is complete, check the “Launch the program” option and click “Finish”.

The search should start automatically and its status should be displayed.

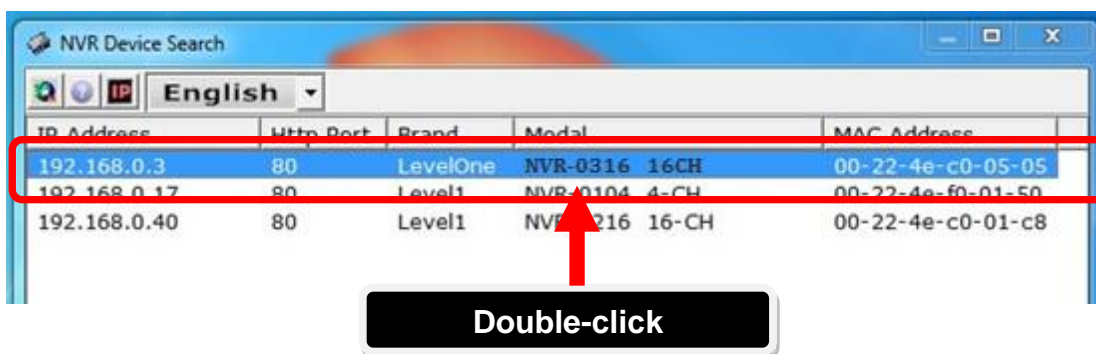

The NVR should be located and its IP address should be displayed.

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Double-click on an NVR and the search program should automatically access the NVR's web administration page from your default browser.

You should be prompted for the NVR's username and password. Enter its default username "**root**" and password "**root**" and then click "OK" to enter the system.

Access the NVR with its default IP address

The NVR comes with a pre-configured static IP “**192.168.101.50**”. However, it is only used when there is no DHCP server presented in the network. The NVR will turn on its DHCP server function and act as the DHCP server in the network.

To connect to the NVR, connect the PC directly to the NVR using a crossover CAT5 Ethernet cable. Simply access the NVR from your web browser with its IP address.

Again, you should be prompted for the username and password. Enter its default username “**root**” and password “**root**” and then click “OK” to enter the system.

Add a Camera

Automatic Search

1. Click the "Search" button to perform the camera search.

Click here to search camera:

A rectangular button with the text "Search" inside, highlighted with a red border.

* You may skip this step and add a camera manually by entering camera's setting in the "Camera Information" section

Add New Channel:

Channel ID:

Channel Name:

IP Address:

User Name:

Password:

HTTP Port:

Once you fill out above information, click "Detect" to retrieve camera setting

2. You should be prompted to install Active Control component in order for the search to function properly. Go ahead and click "Install".

3. After that, the search should begin and its status should be displayed:

4. Found cameras should be listed and simply select a camera from the list and press “Configure”.

LevelOne	FCS-5051	192.168.0.149	80	∞
LevelOne	FCS-3091	192.168.0.150	80	
Level One	FCS-0031	192.168.0.151	80	∞

Mit dem NVR verbinden

Es gibt verschiedene Möglichkeiten, den NVR zu verbinden; nachstehenden finden Sie die empfohlenen Methoden bei verschiedenen Netzwerkeinrichtungen:

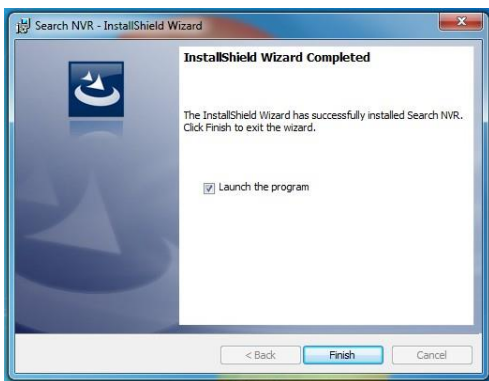

LevelOne Device Search (LevelOne-Gerätesuche)-Programm nutzen

Falls sich der NVR in einem Unternehmensnetzwerk oder einem lokalen Netzwerk mit vorhandenem DHCP-Server befindet, führen Sie das Programm "LevelOne Device Search" (LevelOne-Gerätesuche) von einem Computer aus, der sich im selben Netzwerk befindet; machen Sie den NVR mit der IP-Adresse, die ihm über den übergeordneten DHCP-Server zugewiesen wurde, ausfindig.

Starten Sie zu Beginn das „LevelOne Device Search“ (LevelOne-Gerätesuche)-Programm von der CD und führen Sie die Installation durch:

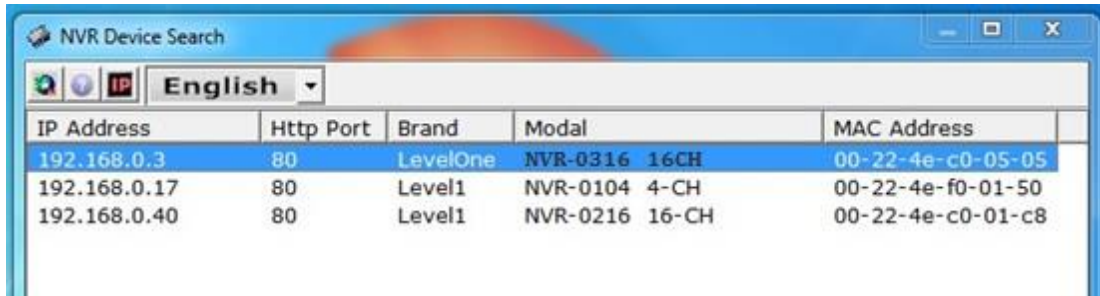

Sobald die Installation abgeschlossen ist, setzen Sie ein Häkchen bei der Option „Launch the program“, klicken Sie dann auf „Finish“ (Fertigstellen).

Die Suche startet automatisch; der Status wird angezeigt.

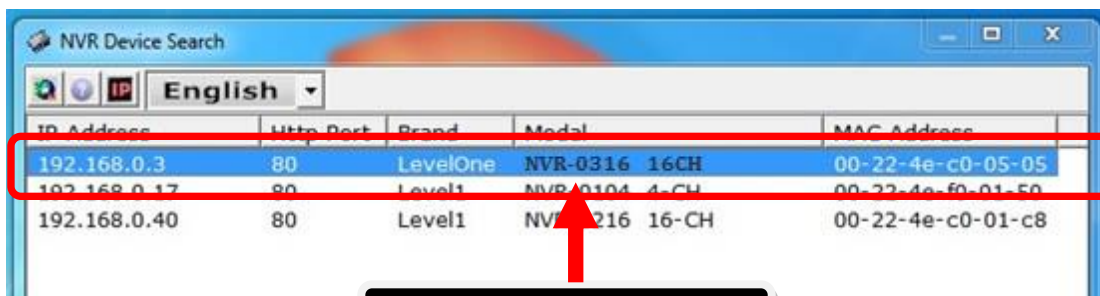

Der NVR sollte nun erkannt und die IP-Adresse angezeigt werden.

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Doppelklicken Sie auf den NVR, das Suchprogramm greift daraufhin automatisch über Ihren Standard-Browser auf die Web-Administrationsseite des NVR zu.

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Double-click

Sie werden aufgefordert, den Benutzernamen und das Kennwort des NVR einzugeben. Geben Sie den Standardbenutzernamen „root“ und das Kennwort „root“ ein, klicken Sie dann zum Aufrufen des Systems auf „OK“.

Windows Security

The server 192.168.0.3 at NVR-0216 requires a username and password.

Warning: This server is requesting that your username and password be sent in an insecure manner (basic authentication without a secure connection).

User name:

Password:

Remember my credentials

OK Cancel

Auf den NVR mit seiner Standard-IP-Adresse zugreifen

Der NVR verfügt über eine vorkonfigurierte statische IP-Adresse "192.168.101.50". Sie wird jedoch nur verwendet, wenn sich kein DHCP-Server im Netzwerk befindet. Der NVR aktiviert seine DHCP-Serverfunktion und agiert als DHCP-Server im Netzwerk.

Schließen Sie den PC zum Herstellen der Verbindung mit dem NVR direkt über ein Crossover-CAT5-Ethernet-Kabel am NVR an. Greifen Sie einfach über Ihren Webbrowser mit der entsprechenden IP-Adresse auf den NVR zu.

Erneut werden Sie nach Benutzernamen und Kennwort gefragt. Geben Sie den Standardbenutzernamen „root“ und das Kennwort „root“ ein klicken Sie dann zum Aufrufen des Systems auf „OK“.

Eine Kamera hinzufügen

Automatische Suche

1. Klicken Sie zur Durchführung einer Kamerasuche auf die „Search“ (Suche)-Schaltfläche.

Click here to search camera:

Search

* You may skip this step and add camera manually by entering camera's setting in the "Camera Information" section

Add New Channel:

Channel ID: 4

Channel Name: cam4

IP Address:

User Name:

Password:

HTTP Port: 80

Detect

Once you fill out above information, click "Detect" to retrieve camera setting

Add

Cancel

2. Sie werden aufgefordert, die Active Control (Aktive Steuerung)-Komponente zu installieren, damit die Suche korrekt funktionieren kann. Fahren Sie fort und klicken Sie auf „Installieren“..

3. Anschließend beginnt die Suche; der Status wird angezeigt:

4. Gefundene Kameras werden aufgelistet; wählen Sie einfach eine Kamera aus der Liste und klicken Sie auf „Configure“ (Konfigurieren).

LevelOne	FCS-5051	192.168.0.149	80	∞
LevelOne	FCS-3091	192.168.0.150	80

Fixez les supports de HDD sur le système avec des vis.

Connexion du NVR

Il existe plusieurs méthodes pour connecter le NVR ; vous trouvez ci-dessous les méthodes suggérées pour différentes configurations de réseau:

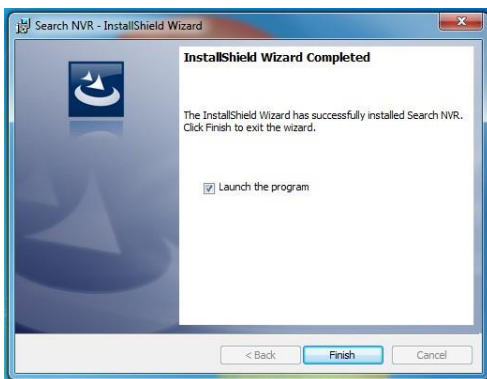

Utilisation de l'utilitaire de recherche de périphérique LevelOne

Si le NVR est placé sur un réseau d'entreprise ou un réseau local où un serveur DHCP est déjà présent, utilisez l'utilitaire « **LevelOne Device Search** » (Recherche de périphérique LevelOne) à partir d'un ordinateur qui se trouve sur le même réseau et repérez le NVR avec son adresse IP qui a été attribuée par le serveur DHCP de niveau supérieur.

Pour commencer, lancez l'utilitaire « LevelOne Device Search » (Recherche de périphérique LevelOne) sur le CD et procédez à l'installation:

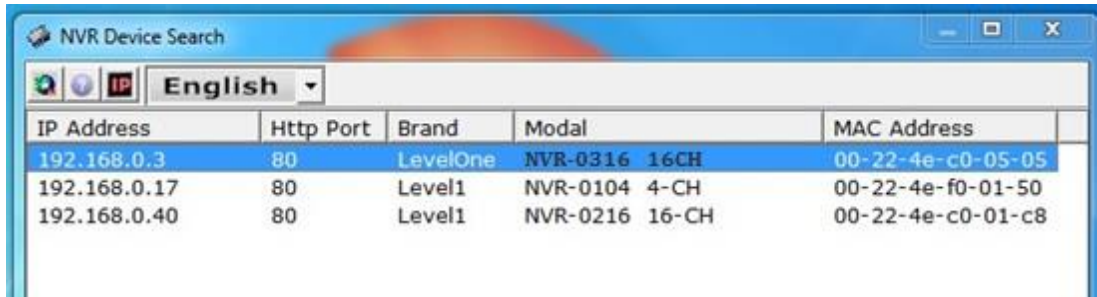

Une fois l'installation terminée, cochez l'option « Launch the program » et cliquez sur « Finish » (Terminer):

La recherche devrait commencer automatiquement et son état devrait être affiché:

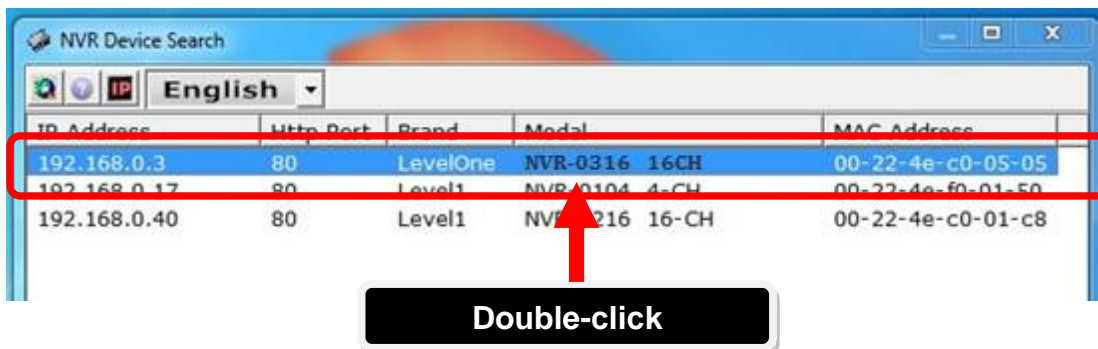

Le NVR devrait être repéré et son adresse IP devrait être affichée:

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Double-cliquez sur le NVR et le programme de recherche devrait accéder automatiquement à la page d'administration web à partir de votre navigateur par défaut.

Il vous sera demandé de fournir le nom d'utilisateur et le mot de passe pour NVR. Entrez le nom d'utilisateur « root » et le mot de passe « root » par défaut, puis cliquez sur « OK » pour accéder au système.

Accéder au NVR avec son adresse IP par défaut

Le NVR est fourni avec une IP statique préconfigurée « **192.168.101.50** ». Cependant, elle n'est utilisée que lorsqu'il n'y a pas de serveur DHCP présent sur le réseau. Le NVR activera sa fonction de serveur DHCP et fonctionnera comme serveur DHCP sur le réseau.

Pour établir la connexion avec le NVR, connectez le PC directement sur le NVR à l'aide d'un câble Ethernet crossover CAT5. Accédez simplement au NVR à partir de votre navigateur web avec son adresse IP.

De nouveau, il vous sera demandé de fournir le nom d'utilisateur et le mot de passe. Entrez le nom d'utilisateur « **root** » et le mot de passe « **root** » par défaut et cliquez sur « OK » pour accéder au système.

Ajouter une caméra

Recherche automatique

1. Cliquez sur le bouton « Search » (Rechercher) pour procéder à la recherche de caméra.

Click here to search camera:

Search

* You may skip this step and add camera manually by entering camera's setting in the "Camera Information" section

Add New Channel:

1. Comience quitando los tornillos del lateral.

2. Empuje la parte superior de la carcasa hacia adelante y, a continuación, levántela.

3. Instale la unidad de disco duro en los soportes con tornillos.
Prepare los soportes de la unidad de disco duro.

Fije la unidad de disco duro en el soporte con tornillos. Puede instalar dos unidades de disco duro con soportes.

4. Instale el cable SATA

Prepare el cable SATA.

Instalar cables SATA en el sistema

Instale el cable de datos SATA.

Instale el cable de alimentación.

Instale el cable SATA en la unidad de disco duro.

Instalar los soportes de la unidad de disco duro

Fije los soportes de la unidad de disco duro del sistema con tornillos.

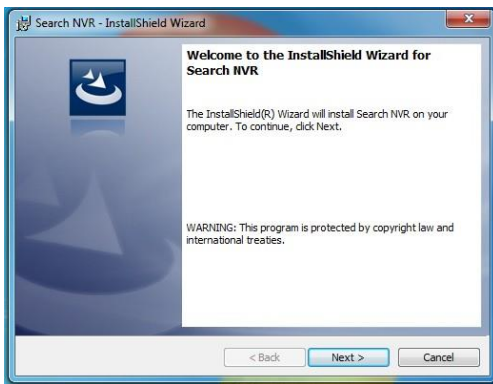

Conexión con el dispositivo NVR

Existen distintas formas de conexión con el dispositivo NVR. A continuación se describen los métodos recomendados según las distintas configuraciones de red:

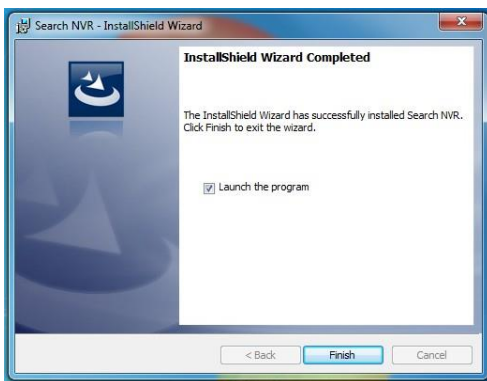

Uso de la utilidad LevelOne Device Search (Búsqueda de dispositivos LevelOne)

Si el dispositivo NVR forma parte de una red corporativa o una red de área local en la que exista un servidor DHCP, ejecute la utilidad “**LevelOne Device Search**” (Búsqueda de dispositivos LevelOne) desde un equipo que pertenezca a la misma red y busque el dispositivo NVR a través de la dirección IP asignada por el servidor DHCP de nivel superior.

Inicie en primer lugar la utilidad “LevelOne Device Search” (Búsqueda de dispositivos LevelOne) desde el CD y lleve a cabo la instalación:

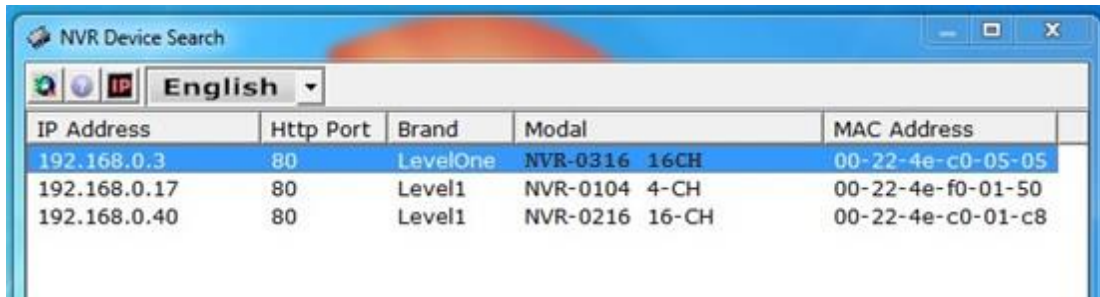

Una vez finalizada la instalación, marque la opción “Launch the program” y haga clic en “Finish” (Finalizar):

La búsqueda se iniciará automáticamente y su estado se mostrará en la pantalla:

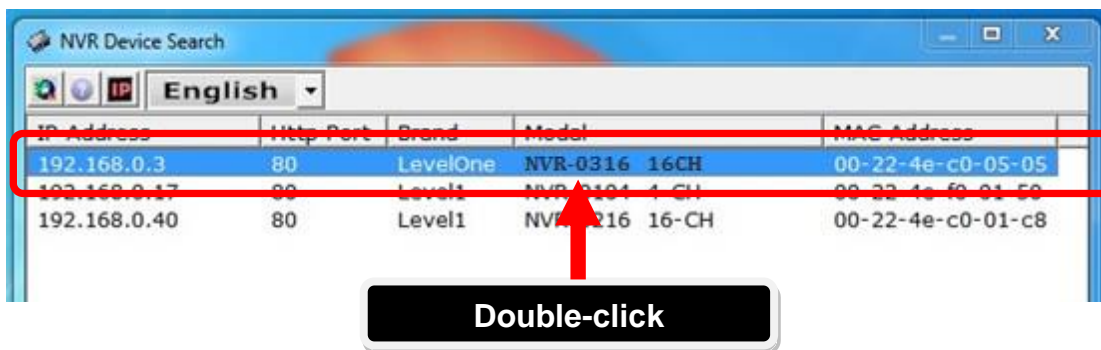

Una vez llevada a cabo la búsqueda, el dispositivo NVR debe haber sido localizado y su dirección IP aparecer en la pantalla:

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Haga doble clic en un dispositivo NVR para que el programa de búsqueda acceda automáticamente a la página de administración web del dispositivo NVR a través de su explorador predeterminado.

El sistema le pedirá que introduzca el nombre de usuario y la contraseña del dispositivo NVR. Introduzca el nombre de usuario “**root**” y la contraseña “**root**” predeterminados. A continuación, haga clic en “OK” (Aceptar) para acceder al sistema.

Acceso al dispositivo NVR a través de su dirección IP predeterminada

La dirección IP estática preconfigurada en el dispositivo NVR es “192.168.101.50”. No obstante, dicha dirección se usa sólo si no hay ningún servidor DHCP presente en la red. El dispositivo NVR activará su función de servidor DHCP y actuará como servidor DHCP de la red.

Si desea conectarse al dispositivo NVR, conecte su PC directamente al dispositivo NVR a través de un cable Ethernet cruzado de categoría CAT5. Acceda entonces al dispositivo NVR a través de su dirección IP utilizando un explorador web.

De nuevo, el sistema le pedirá que introduzca su nombre de usuario y su contraseña. Introduzca el nombre de usuario “root” y la contraseña “root” predeterminados. A continuación, haga clic en “OK” (Aceptar) para acceder al sistema.

Agregar una cámara

Búsqueda automática

1. Haga clic en el botón "Search" (Buscar) para buscar la cámara.

Click here to search camera:

Search

* You may skip this step and add camera manually by entering camera's setting in the "Camera Information" section

Add New Channel:

1. Start door de schroeven op de zijkant te verwijderen.

2. Duw de bovenste behuizing naar voor en til deze vervolgens op.

3. Installeer HDD op beugels met schroeven

Bereid HDD-beugels voor.

Bevestig de HDD op de beugel met de schroeven. U kunt twee HDD's met beugels installeren.

4. Installeer de SATA-kabel

Bereid de SATA-kabel voor.

Installeer SATA-kabels op het systeem

Installeer de SATA-gegevenskabel.

Installeer de voedingskabel.

Installeer de SATA-kabel op de HDD.

Installeer HDD-beugels

Bevestig de HDD-beugels op het systeem met schroeven.

Aansluitingen op de NVR

Er zijn diverse manieren om aan te sluiten op de NVR. Hieronder staan enkele suggesties voor de verschillende netwerken:

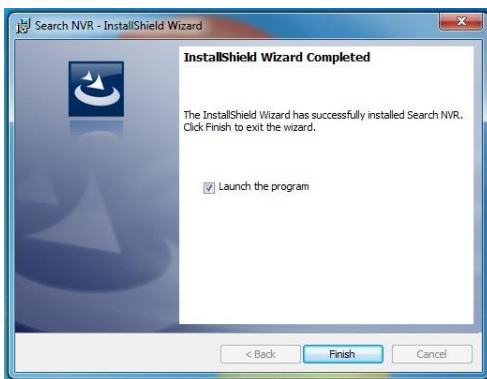

Met het zoekprogramma voor een LevelOne-apparaat

Bevindt de NVR zich in een bedrijfsnetwerk of een lokaal netwerk waarin zich een DHCP-server bevindt, start dan het programma “**LevelOne Device Search**” op een computer in hetzelfde netwerk en zoek de NVR met het IP-adres dat is toegekend door de DHCP-server op het hoogste niveau.

Allereerst start u het programma “LevelOne Device Search” van de cd en gaat u verder met de installatie:

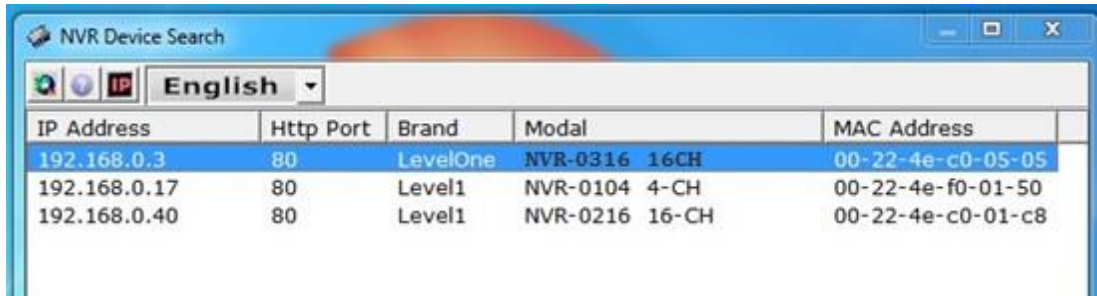

Is de installatie voltooid, markeer dan de optie “Launch the program” en klik op “Voltooien”:

Het zoeken moet automatisch starten en de voortgang is zichtbaar:

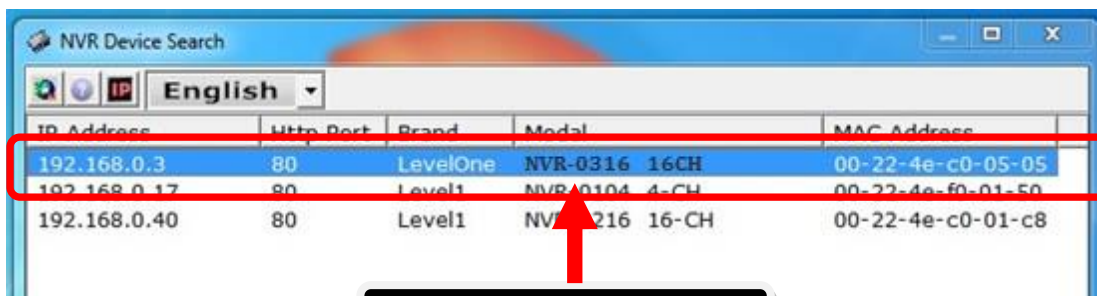

De NVR wordt gevonden en het IP-adres wordt getoond:

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Dubbelklik op een NVR en het zoekprogramma opent automatisch de pagina voor het beheer van de NVR in uw standaardbrowser.

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Double-click

Er wordt gevraagd om de gebruikersnaam en het wachtwoord van de NVR. De standaardgebruikersnaam is "root" en het wachtwoord "root". Klik daarna op "OK" om het systeem te openen.

Windows Security

The server 192.168.0.3 at NVR-0216 requires a username and password.

Warning: This server is requesting that your username and password be sent in an insecure manner (basic authentication without a secure connection).

User name:

Password:

Remember my credentials

OK Cancel

Toegang tot de NVR met het standaard-IP-adres

De NVR is reeds geconfigureerd met een statisch IP-adres: “192.168.101.50”. Dit wordt echter alleen gebruikt als er geen DHCP-server in het netwerk is. De NVR zet dan de DHCP-server aan en werkt zelf als de DHCP-server in het netwerk.

Om verbinding te maken met de NVR, sluit u de computer direct op de NVR aan met een gekruiste CAT5-Ethernetkabel. Open de NVR met het IP-adres in de webbrowser.

Weer wordt gevraagd om de gebruikersnaam en het wachtwoord. De standaardgebruikersnaam is “root” en het wachtwoord is “root”. Klik daarna op “OK” om het systeem te openen.

Een camera toevoegen

Automatisch zoeken

1. Klik op de knop “Zoeken” om een camera te zoeken.

Click here to search camera:

Search

* You may skip this step and add a camera manually by entering camera's setting in the "Camera Information" section

Add New Channel:

Channel ID: 4

Channel Name: cam4

IP Address:

User Name:

Password:

HTTP Port: 80

Detect Once you fill out above information, click "Detect" to retrieve camera setting

Add

Cancel

2. Er wordt gevraagd om een actief besturingscomponent te installeren om naar de functie te zoeken. Ga verder en klik op “Installeren”.

3. Het zoeken moet daarna beginnen en de toestand wordt getoond:

4. De gevonden camera's worden getoond. Kies een camera uit de lijst en klik op "Configureren".

LevelOne	FCS-5051	192.168.0.149	80	*
LevelOne	FCS-3091	192.168.0.150	80	
Level One	FCS-0031	192.168.0.151	80	*

3. Spænd harddisken fast på beslagene med skruerne
Forberedt harddiskbeslag.

Spænd harddisken fast på beslaget med skruerne. Det er muligt, at sætte to harddiske i med beslagene.

4. Tilslut SATA-kablet

Forbered SATA-kablet.

Tilslut SATA-kablerne i systemet

Tilslut SATA-datakablet.

Tilslut strømkablet.

Tilslut SATA-kablet i harddisken.

Sæt harddiskbeslagene i enheden

Spænd harddiskbeslagene fast i systemet med skruerne.

Forbind til NVR

Der kan tilsluttes til NVR på forskellige måder. Nedenfor er nogle forslag til forskellige netværksopsætninger:

Brug LevelOne Device søgeprogram

Hvis NVR befinder sig i et virksomhedsnetværk eller et lokalområde netværk, hvor der allerede findes en DHCP server, skal du køre “**LevelOne Device Search**” (LevelOne Device søgning) programmet fra en computer i det samme netværk og lokalisere NVR med IP adressen tildelt af top-niveau DHCP serveren.

Begynd med starte “LevelOne Device Search” (LevelOne Device søgning) programmet på cd'en og fortsæt med installationen:

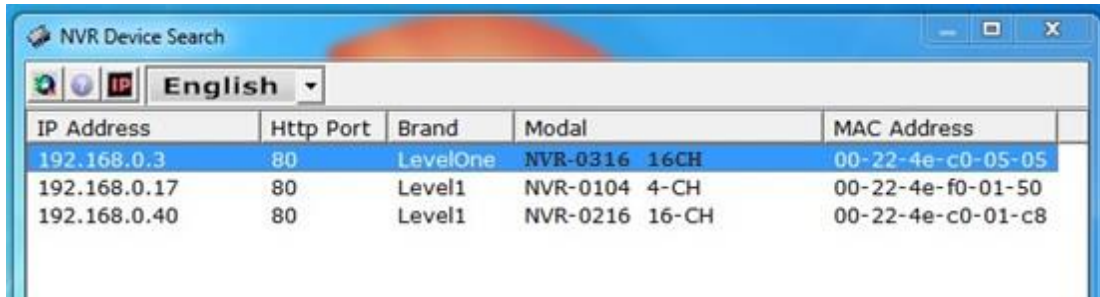

Når installationen er fuldført, afmærk “Launch the program” og klik på “Finish” (Afslut).

Søgningen begynder automatisk, og dens status vises:

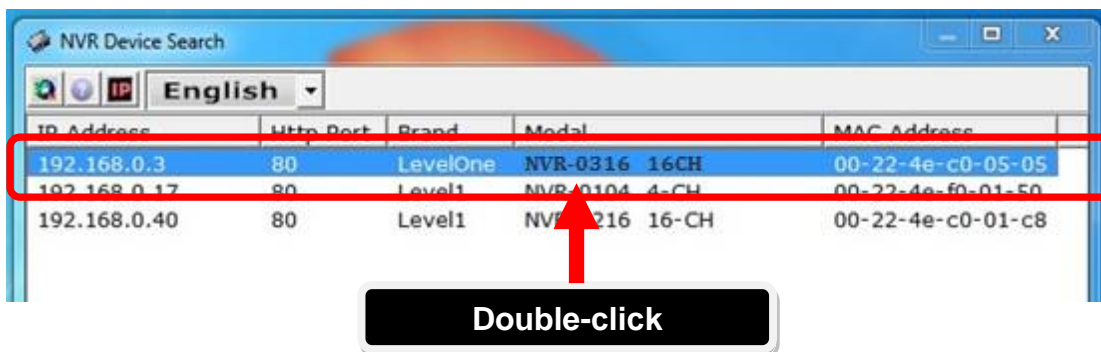

NVR lokaliseres, og dens IP adresse vises:

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Dobbelklik på en NVR, hvorefter søgeprogrammet automatisk tilgår NVR's web-administrationsside fra standardbrowseren

Du anmodes om NVR's brugernavn og password. Indtast standardbrugernavnet "**root**" og password'et "**root**" og klik derefter på "OK" for at åbne systemet.

Tilgå NVR med dens standard IP adresse

NVR leveres med en forkonfigureret, statisk IP "192.168.101.50". Den bruges imidlertid kun, når der ikke er nogen DHCP server i netværket. NVR aktiverer sin DHCP serverfunktion og fungerer som DHCP serveren i netværket.

Forbind til NVR ved at forbinde pc'en direkte til NVR med et crossover CAT5 Ethernet kabel. Tilgå således ganske enkelt NVR fra din webbrowser med dens IP adresse.

Du anmodes igen om brugernavn og password. Indtast standarbrugernavnet "root" og password'et "root" og klik derefter på "OK" for at åbne systemet.

Tilføj et kamera

Automatisk søgning

1. Klik på "Search" (Søgning) knappen for at foretage kamerasøgningen.

Click here to search camera:

Search

* You may skip this step and add camera manually by entering camera's setting in the "Camera Information" section

Add New Channel:

Channel ID: 4

Channel Name: cam4

IP Address:

User Name:

o al videoregistratore di rete

Ci sono vari modi per eseguire il collegamento al videoregistratore di rete e di seguito sono illustrati i metodi suggeriti per le varie configurazioni di rete:

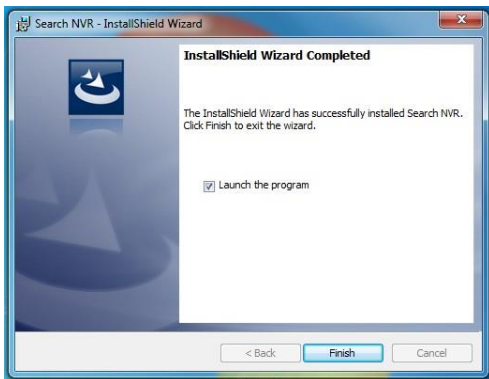

Uso dell'utilità LevelOne Device Search

Se il videoregistratore di rete è installato in una rete aziendale o LAN dove è presente un server DHCP, eseguire l'utilità “**LevelOne Device Search**” (Ricerca dispositivi LevelOne) da un computer che si trova sulla stessa rete e trovare il videoregistratore di rete col suo indirizzo IP che è assegnato dal server DHCP di livello più alto.

Per iniziare, avviare l'utilità “LevelOne Device Search” (Ricerca dispositivi LevelOne) dal CD e procedere con l'installazione:

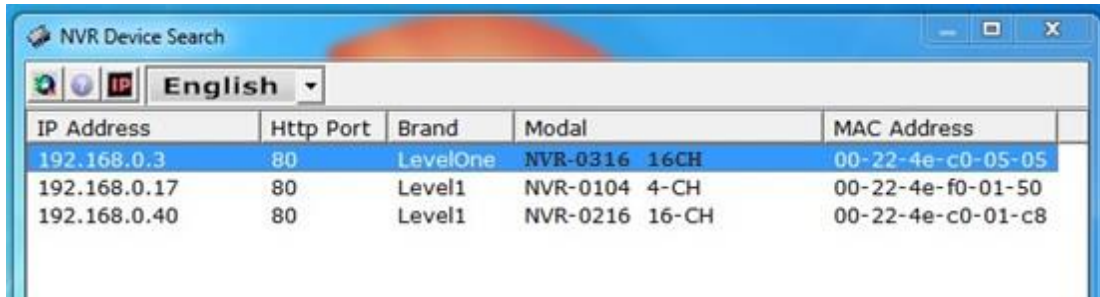

Al termine dell'installazione, selezionare l'opzione “Launch the program” e fare clic su “Finish” (Fine):

La ricerca si avvia automaticamente ed è visualizzato il suo stato:

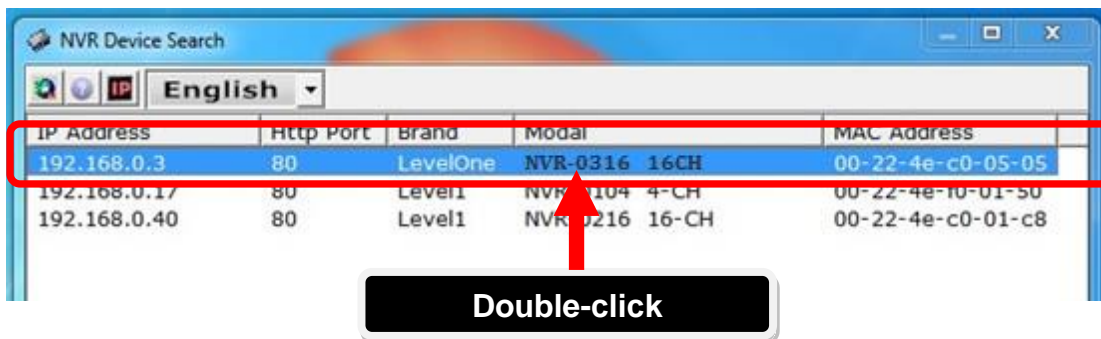

Il videoregistratore di rete è trovato ed è visualizzato il suo indirizzo IP:

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Fare doppio clic su un videoregistratore di rete ed il programma di ricerca accede automaticamente alla pagina web d'amministrazione del videoregistratore di rete usando il browser predefinito.

Sarà richiesto di inserire nome utente e password del videoregistratore di rete. Inserire il nome utente predefinito “**root**” e la password predefinita “**root**”, poi fare clic su “OK” per accedere al sistema.

Accedere al videoregistratore di rete col suo indirizzo IP predefinito

Il videoregistratore di rete è fornito con un indirizzo IP statico pre-configurato: “192.168.101.50”. Questo, tuttavia, è usato solo quando sulla rete non ci sono server DHCP. Il videoregistratore di rete attiverà la sua funzione server DHCP e funzionerà come server DHCP nella rete.

Per eseguire il collegamento al videoregistratore di rete, collegare il PC direttamente al videoregistratore di rete usando un cavo Ethernet CAT5. Accedere al videoregistratore di rete col browser semplicemente usando il suo indirizzo IP.

Sarà richiesto di nuovo di inserire nome utente e password. Inserire il nome utente predefinito “root” e la password predefinita “root”, poi fare clic su “OK” per accedere al sistema.

Aggiungere una telecamera

Ricerca automatica

1. Fare clic sul tasto “Search” (Cerca) per eseguire la ricerca della telecamera.

Click here to search camera:

Search

* You may skip this step and add a new camera manually by entering camera's setting in the "Camera Information" section

Add New Channel:

Channel ID: 4

Channel Name: cam4

IP Address:

User Name:

Password:

HTTP Port: 80

Detect

Once you fill out above information, click "Detect" to retrieve camera setting

Add

Cancel

2. Potrebbe essere richiesto di installare il componente Active Control perché la ricerca funzioni in modo appropriato. Proseguire e fare clic su “Install” (Installa).

3. Dopodiché, la ricerca si avvia ed è visualizzato il suo stato:

4. Sono elencate le telecamere trovate; selezionare una telecamera dall'elenco e premere "Configure" (Configura).

LevelOne	FCS-5051	192.168.0.149	80	*
LevelOne	FCS-3091	192.168.0.150	80

Στερεώστε τους βραχίονες τοποθέτησης υποδοχής HDD στο σύστημα με βίδες.

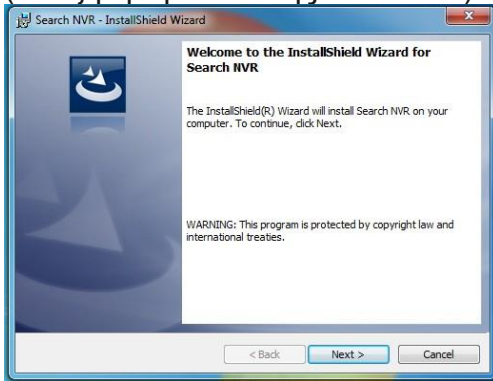

Σύνδεση με το NVR

Υπάρχουν διάφοροι τρόποι με τους οποίους μπορείτε να συνδεθείτε με το NVR και παρακάτω ακολουθούν οι συνιστώμενες μέθοδοι για διαφορετική ρύθμιση δικτύου:

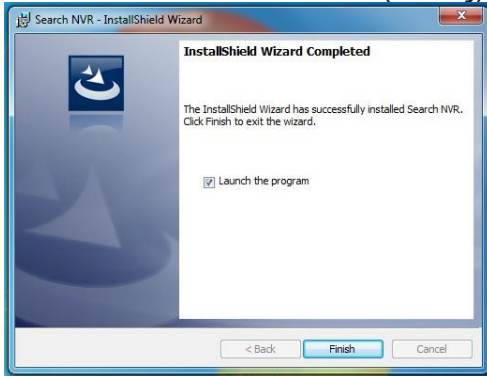

Χρήση του Βοηθητικού προγράμματος αναζήτησης της συσκευής LevelOne

Εάν το NVR βρίσκεται σε ένα εταιρικό δίκτυο ή ένα τοπικό δίκτυο στο οποίο βρίσκεται ήδη ένας διακομιστής DHCP, εκτελέστε το βοηθητικό πρόγραμμα "**LevelOne Device Search**" (Αναζήτηση συσκευής LevelOne) από έναν υπολογιστή που ανήκει στο ίδιο δίκτυο και εντοπίστε το NVR με τη διεύθυνση IP του που έχει ανατεθεί από τον διακομιστή DHCP υψηλότερου επιπέδου.

Για να ξεκινήσετε, εκτελέστε το βοηθητικό πρόγραμμα "LevelOne Device Search" (Αναζήτηση συσκευής LevelOne) από το CD και συνεχίστε με την εγκατάσταση:

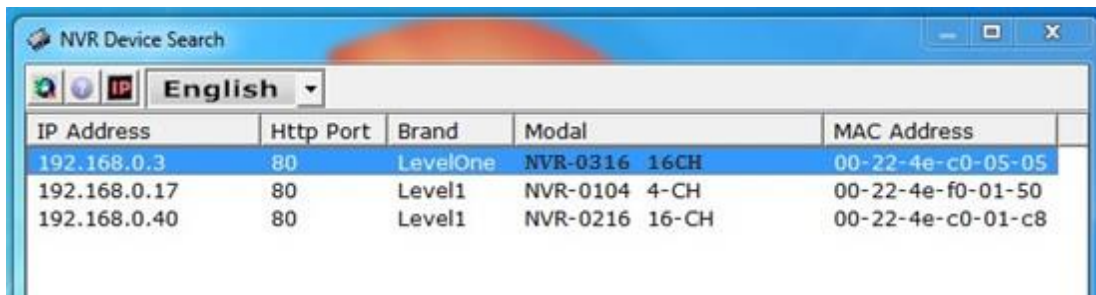

Αφού ολοκληρωθεί η εγκατάσταση, επιλέξτε την επιλογή "Launch the program" και κάντε κλικ στο "Finish" (Τέλος):

Η αναζήτηση θα πρέπει να ξεκινά αυτόματα και θα πρέπει να προβάλλεται η κατάστασή της:

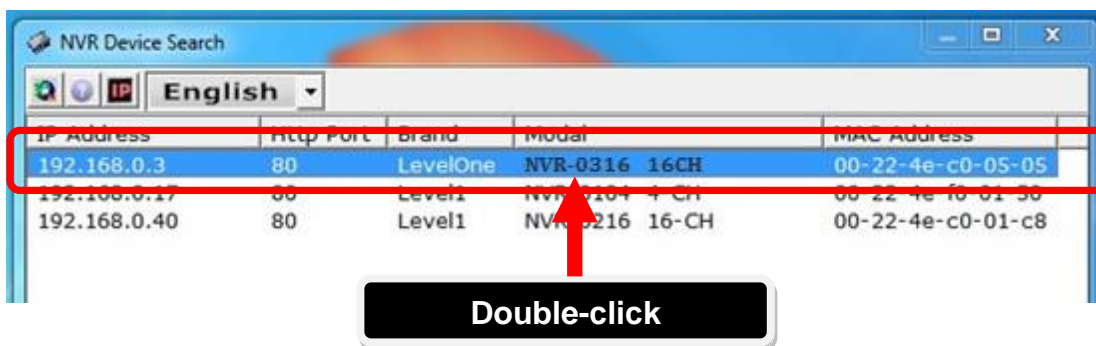

Θα πρέπει να εντοπιστεί το NVR και θα πρέπει να προβάλλεται η διεύθυνση IP του:

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Κάντε διπλό κλικ σε ένα NVR και το πρόγραμμα αναζήτησης θα πρέπει να έχει αυτόματη πρόσβαση στη σελίδα διαχείρισης δικτύου του NVR από το προεπιλεγμένο πρόγραμμα περιήγησής σας

Θα πρέπει να σας ζητηθεί να πληκτρολογήσετε το όνομα χρήστη και τον κωδικό πρόσβασης του NVR. Εισάγετε το προεπιλεγμένο όνομα χρήστη "root" και τον προεπιλεγμένο κωδικό πρόσβασης "root" και κατόπιν κάντε κλικ στο "OK" για να μπείτε στο σύστημα.

Πρόσβαση στο NVR με την προεπιλεγμένη διεύθυνση IP του

Το NVR διατίθεται με ένα προδιαμορφωμένο στατικό IP "**192.168.101.50**". Ωστόσο, χρησιμοποιείται μόνο όταν δεν υπάρχει κάποιος διακομιστής DHCP στο δίκτυο. Το NVR θα ενεργοποιήσει τη λειτουργία διακομιστή DHCP του και θα λειτουργήσει ως ο διακομιστής DHCP στο δίκτυο.

Για να συνδεθείτε με το NVR, συνδέστε το PC απευθείας στο NVR χρησιμοποιώντας ένα καλώδιο διακλάδωσης CAT5 Ethernet. Απλά μπείτε στο NVR από το πρόγραμμα περιήγησης web σας με τη διεύθυνση IP του.

Ξανά, θα πρέπει να σας ζητηθεί να πληκτρολογήσετε το όνομα χρήστη και τον κωδικό πρόσβασης. Εισάγετε το προεπιλεγμένο όνομα χρήστη "**root**" και τον προεπιλεγμένο κωδικό πρόσβασης "**root**" και κατόπιν κάντε κλικ στο "OK" για να μπείτε στο σύστημα.

Προσθήκη κάμερας

Αυτόματη αναζήτηση

1. Κάντε κλικ στο πλήκτρο "Search" (Αναζήτηση) για να πραγματοποιηθεί η αναζήτηση της κάμερας.

Click here to search camera:

Search

* You may skip this step and add camera manually by entering camera's setting in the "Camera Information" section

Add New Channel:

Channel ID:	4
Channel Name:	cam4
IP Address:	
User Name:	
Password:	
HTTP Port:	80

Detect

Once you fill out above information, click "Detect" to retrieve camera setting

Add

Cancel

2. Θα πρέπει να σας ζητηθεί να εγκαταστήσετε το στοιχείο Active Control (Ενεργός έλεγχος) για να λειτουργήσει σωστά η αναζήτηση. Συνεχίστε και κάντε κλικ στο "Install" (Εγκατάσταση).

3. Μετά από αυτό, η αναζήτηση θα πρέπει να ξεκινά αυτόματα και θα πρέπει να προβάλλεται η κατάσταση της:

4. Οι κάμερες που εντοπίστηκαν θα πρέπει να καταγράφονται και απλά επιλέξτε μία κάμερα από τη λίστα και πατήστε "Configure" (Διαμόρφωση).

LevelOne	FCS-5051	192.168.0.149	80	*
LevelOne	FCS-3091	192.168.0.150	80	
Level One	FCS-0031	192.168.0.151	80	*
Level One	WCS-0030	192.168.0.154	80	
Level One	FCS-6000	192.168.0.155	80	
LevelOne	FCS-0071	192.168.0.156	80	

1

2 Click a camera from search result and click "Configure" to configure setting below.

5. Οι αντίστοιχες πληροφορίες της θα πρέπει να προβάλλονται στην ενότητα "Camera Information" (Πληροφορίες κάμερας). Εισάγετε το όνομα χρήστη και τον κωδικό πρόσβασης της και επιλέξτε την ταυτότητα (ID) καναλιού και ονομάστε την κάμερα.

Add New Channel:

Channel ID: 4

Channel Name: FCS-3091

IP Address: 192.168.0.150

User Name:

Password:

HTTP Port: 80

Detect Once you fill out above information, click "Detect" to retrieve camera setting

6. Κάντε κλικ στο "Detect" (Εντοπισμός) για να δημιουργήσετε μία σύνδεση ανάμεσα στη συσκευή εγγραφής και την κάμερα. Εάν η σύνδεση δημιουργηθεί με επιτυχία, οι λεπτομερείς πληροφορίες της κάμερας θα πρέπει να ανιχνευτούν και να προβληθούν ως εξής.

Ligação ao NVR

Existem várias formas de efectuar a ligação ao NVR. Descrevemos abaixo os métodos sugeridos para as diferentes configurações de rede:

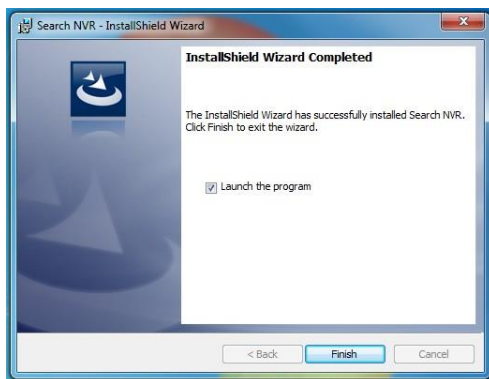

Utilizar o utilitário LevelOne Device Search

Se o NVR estiver instalado numa rede empresarial ou numa rede de área local onde já existir um servidor DHCP, execute o utilitário “**LevelOne Device Search**” a partir de um computador na mesma rede e localize o NVR com o endereço IP que lhe foi atribuído pelo servidor DHCP de nível superior.

Para começar, execute o utilitário “Device Search” a partir do CD e proceda à sua instalação:

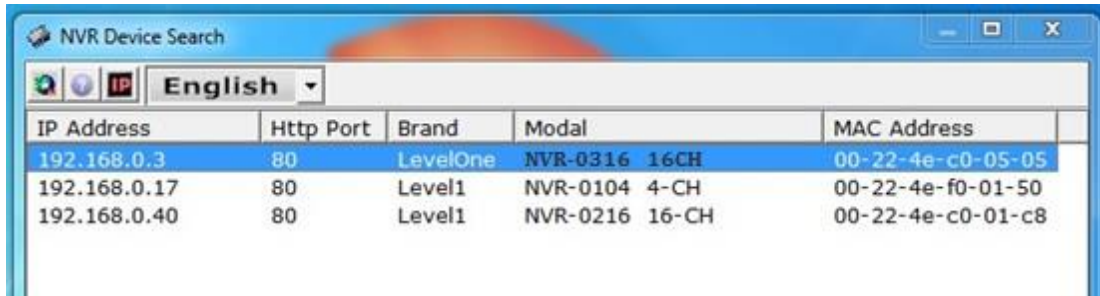

Quando a instalação estiver concluída, assinale a opção “Launch the program” e clique em “Finish” (Concluir).

A pesquisa irá iniciar automaticamente e o seu estado será exibido.

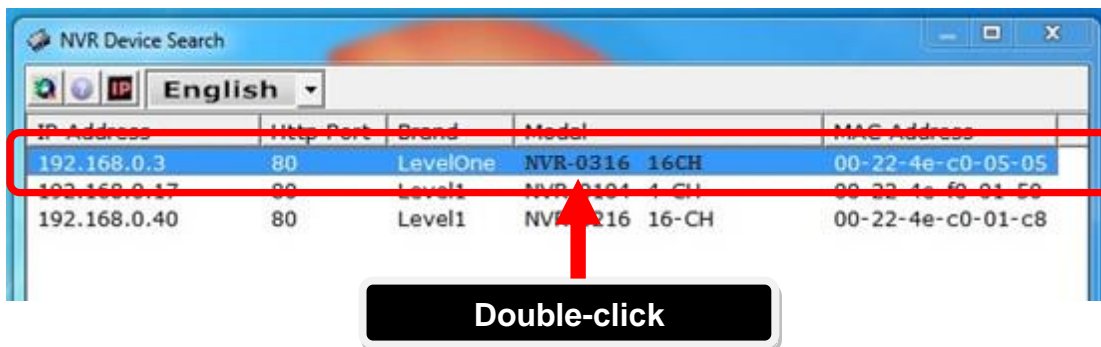

O NVR será localizado e o seu endereço IP será exibido.

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Faça duplo clique num NVR e o programa de pesquisa irá aceder automaticamente à página Web de administração do NVR utilizando o navegador Web predefinido.

Ser-lhe-á pedido para introduzir o nome de utilizador e a palavra-passe do NVR. Introduza o nome de utilizador **“root”** e a palavra-passe **“root”** predefinidos e clique em **“OK”** para aceder ao sistema

Aceder ao NVR através do endereço IP predefinido

O NVR vem pré-configurado com o endereço IP estático “**192.168.101.50**”. No entanto, este apenas é utilizado se não existir um servidor DHCP na rede. O NVR irá activar a função de servidor DHCP e assumir o papel de servidor DHCP na rede.

Para efectuar a ligação ao NVR, ligue o PC directamente ao NVR utilizando um cabo Ethernet CAT5 cruzado. Aceda ao NVR pelo endereço IP utilizando o seu navegador Web.

Aqui ser-lhe-á também pedido para introduzir o nome de utilizador e a palavra-passe. Introduza o nome de utilizador “**root**” e a palavra-passe “**root**” predefinidos e clique em “OK” para aceder ao sistema.

Adicionar uma câmara

Pesquisa automática

1. Clique no botão “Search” (Pesquisar) para executar a pesquisa de câmaras.

Click here to search camera:

Search

* You may skip this step and add a new camera manually by entering camera's setting in the "Camera Information" section

Add New Channel:

Channel ID: 4

Channel Name: cam4

1. Börja med att ta bort skruvarna på sidan.

2. Skjut höljets överdel framåt, och lyft upp det.

3. Montera hårddisken på konsolerna med skruvar
Förbered hårddiskkonsolerna..

Fäst hårddisken på konsolen med skruvar. Du kan montera två hårddiskar med konsoler.

4. Installera SATA-kabel

Förbered SATA-kabeln.

Installera SATA-kablar på systemet

Installera SATA-datakabel.

Installera nätkabeln.

Installera SATA-kabeln på hårddisken.

Montera hårddiskkonsolerna

Fäst hårddiskkonsolerna på systemet med skruvar

Ansluta till NVR

Du kan ansluta till NVR på olika sätt. Nedan hittar du förslag på metoder för olika nätverksinställningar:

Använda sökverktyget för LevelOne-enhet

Om NVR-enheten är placerad i ett företagsnätverk eller ett lokalt nätverk där det redan finns en DHCP-server, kör verktyget “**LevelOne Device Search**” (LevelOne-enhetssökning) från en dator som finns isa, a nätverk och leta reda på NVR-enheten med dess IP-adress som har tilldelats av den primära DHCP-servern.

Börja med att starta verktyget “LevelOne Device Search” (LevelOne-enhetssökning) från CD-skivan och fortsätt med installationen:

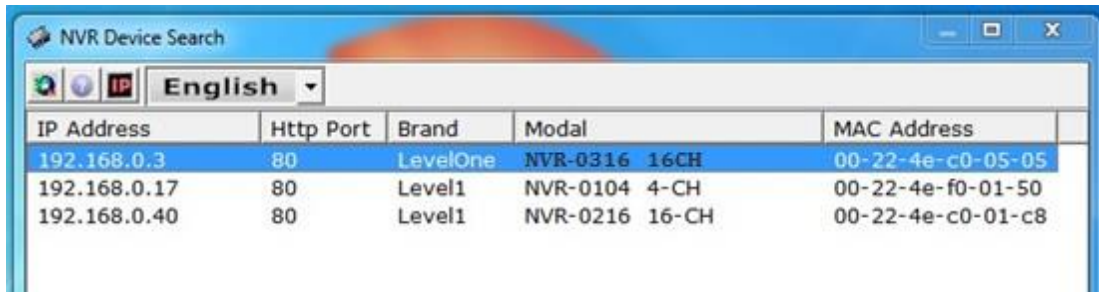

När installationen är slutförd, markera alternativet “Launch the program” och klicka på “Finish” (slutför):

Sökningen ska starta automatiskt och dess status visas:

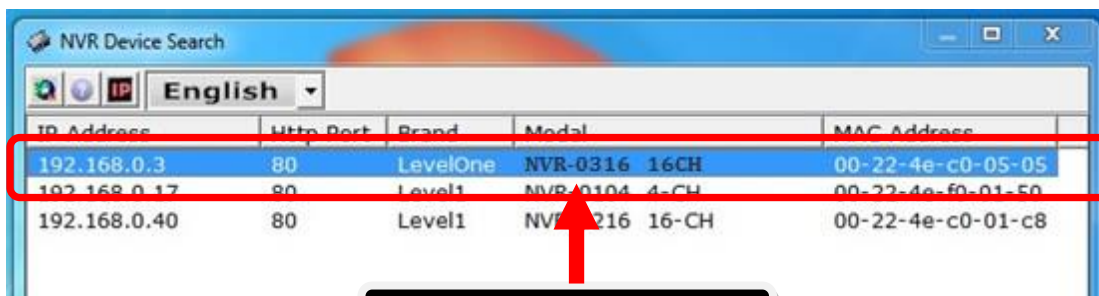

NVR-enheten ska hittas och dess IP-adress ska visas:

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Dubbelklicka på en NVR-enhet och sökprogrammet ska automatiskt öppna NVR-enhetens webbadministrationssida från din standardwebbläsare.

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Double-click

Du uppmanas att ange användarnamn och lösenord för NVR. Ange enhetens standardanvändarnamn **“root”** och lösenord **“root”** och klicka därefter på **“OK”** för att komma in i systemet.

Då åtkomst till NVR med dess standard-IP-adress

NVR-enheten levereras med en förkonfigurerad statisk IP-adress: "192.168.101.50". Denna används dock enbart om det inte finns någon DHCP-server i nätverket. NVR sätter på sin DHCP-serverfunktion och fungerar som DHCP-server i nätverket.

Du ansluter till NVR genom att ansluta PC:n direkt till NVR-enheten med en crossover-CAT5 Ethernet-sladd. Du får helt enkelt åtkomst till NVR från din webbläsare med dess IP-adress.

Återigen kommer du att uppmanas att ange användarnamn och lösenord. Ange enhetens standardanvändarnamn "**root**" och lösenord "**root**" och klicka därefter på "OK" för att komma in i systemet.

Lägga till en kamera

Automatisk sökning

1. Klicka på knappen "Search" (sök) för att söka efter kamera.

Click here to search camera:

Search

* You may skip this step and add camera manually by entering camera's setting in the "Camera Information" section

Add New Channel:

Channel ID:	4
Channel Name:	cam4
IP Address:	
User Name:	
Password:	
HTTP Port:	80

Detect

Once you fill out above information, click "Detect" to retrieve camera setting

Add

Cancel

2. Du kommer att uppmanas att installera Active Control-komponenten för att sökningen ska fungera ordentligt. Klicka på "Install" (installera).

3. Efter det ska sökningen börja och dess status visas:

4. Hittade kameror ska listas. Välj en kamera från listan och tryck på "Configure" (konfigurera).

LevelOne	FCS-5051	192.168.0.149	80	*
LevelOne	FCS-3091	192.168.0.150	80	
Level One	FCS-0031	192.168.0.151	80	*
Level One	WCS-0030	192.168.0.154	80	
Level One	FCS-6000	192.168.0.155	80	
LevelOne	FCS-0071	192.168.0.156	80	

1

2 Click a camera from search result and click "Configure" to configure setting below.

5. Dess tillhörande information ska visas i sektionen "Camera Information" (kamerainformation). Ange dess användarnamn och lösenord, välj kanal-ID och döp kameran.

Add New Channel:

Channel ID:

Channel Name:

IP Address:

User Name:

Password:

HTTP Port:

Once you fill out above information, click "Detect" to retrieve camera setting

6. Klicka på "Detect" (hitta) för att upprätta en anslutning mellan inspelaren och kameran. Om anslutningen lyckas, kommer utförlig kamerainformation att samlas in och visas enligt nedan.

Once you fill out above information, click "Detect" to retrieve camera setting

Namestite podatkovni kabel SATA Namestite napajalni kabel.

Namestite kabel SATA na trdi disk.

Namestite nosilce trdega diska

Nosilce trdega diska na sistem pritrdite z vijaki

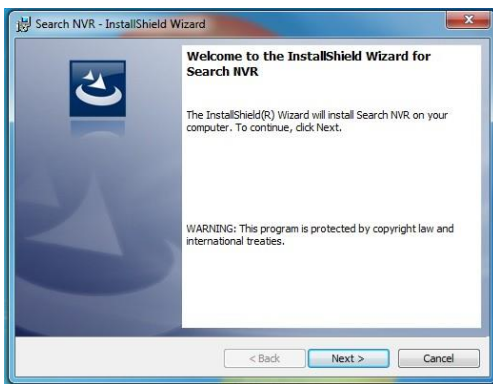

Povežite na NVR

Obstaja več načinov za povezovanje na NVR, spodaj pa so predlagani načini za različne nastavitve omrežja:

Uporabite pripomoček za iskanje naprav LevelOne

Če je NVR nameščen v omrežju podjetja ali v lokalnem omrežju, kjer je že prisoten strežnik DHCPŽ, zaženite “**LevelOne Device Search**” (pripomoček za iskanje naprav LevelOne) iz računalnika, ki je v istem omrežju in poiščite NVR z naslovom IP, ki je dodeljen s strani strežnika DHCP najvišje ravni.

Najprej zaženite “LevelOne Device Search” (pripomoček za iskanje naprav LevelOne) iz zgoščenke in nadaljujte z namestitvijo:

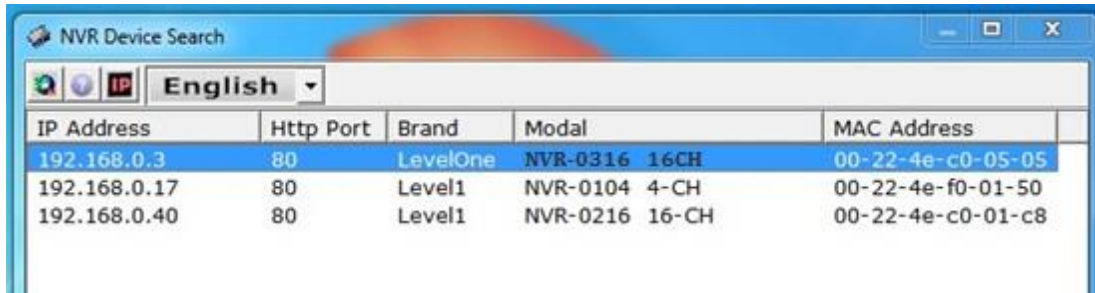

Ko je namestitev končana, preverite možnost “Launch the program” in kliknite “Finish” (Dokončaj):

Iskanje se bi moralo zagnati samodejno, prikazano pa bi moralo biti stanje iskanja:

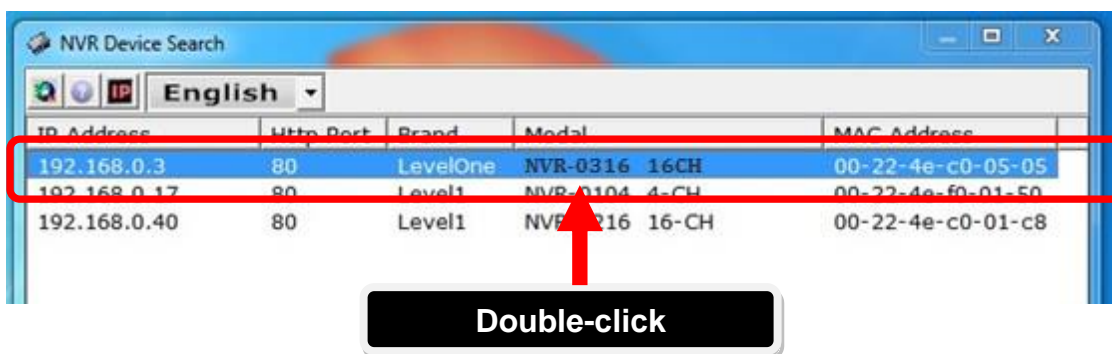

Najden bi moral biti NVR prikazan pa bi moral biti njegov naslov IP:

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Dvokliknite NVR, iskalni program pa bi moral samodejno dostopati do NVR-jev na strani spletne administracije v privzetem brskalniku.

Računalnik vas bo vprašal za vaše uporabniško ime in geslo za NVR. Vnesite privzeto uporabniško ime "**root**" in geslo "**root**" za NVR in nato kliknite "OK" (V redu) za vstop v sistem.

Dostopajte do NVR s privzetim naslovom IP

NVR je dobavljen s predhodno konfiguriranim statičnim naslovom IP "192.168.101.50". Vendar se uporablja le, kadar v omrežju ni prisotnega strežnika DHCP. NVR bo vključil svojo funkcijo strežnika DHCP in deloval kot strežnik DHCP v omrežju.

Za priključitev na NVR računalnik povežite direktno na NVR s prehodnim kablom CAT5 Ethernet. Do NVR preprosto dostopite s svojega brskalnika z njegovim naslovom IP.

Računalnik vas bo ponovno vprašal za vaše uporabniško ime in geslo za NVR. Vnesite privzeto uporabniško ime "root" in geslo "root" za NVR in nato kliknite "OK" (V redu) za vstop v sistem.

Dodaj kamero

Samodejno iskanje

1. Kliknite gumb "Search" (Iskanje) za izvedbo iskanja kamere.

Click here to search camera:

Search

* You may skip this step and add camera manually by entering camera's setting in the "Camera Information" section

Add New Channel:

Channel ID: 4

Channel Name: cam4

IP Address:

User Name:

Password:

HTTP Port: 80

Detect Once you fill out above information, click "Detect" to retrieve camera setting

Add

Cancel

2. Računalnik vas bo pozval, da namestite komponento Active Control, da bo funkcija iskanja delovala pravilno. Nadaljujte in kliknite "Install" (Namesti).

3. Po tem se začne iskanje, pri čemer je prikazano stanje iskanja.

4. Pojavi se seznam najdenih kamer. Izberite kamero s seznama in pritisnite "Configure" (Konfiguriraj).

LevelOne	FCS-5051	192.168.0.149	80	*
LevelOne	FCS-3091	192.168.0.150	80	
Level One	FCS-0031	192.168.0.151	80	*
Level One	WCS-0030	192.168.0.154	80

連接網路影像錄影機

您可以利用不同方式連接網路影像錄影機，建議您依照網路設定選擇下列其中一項方式：

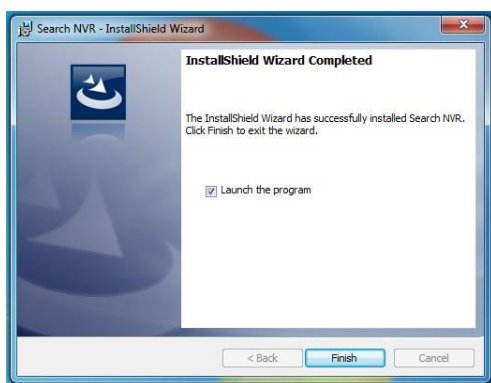

使用 LevelOne 裝置搜尋工具

若您將網路影像錄影機安裝在企業網路或區域網路，並使用 DHCP 伺服器，請在相同網路的電腦端執行「LevelOne 裝置搜尋」(LevelOne Device Search)工具，並選擇高階 DHCP 伺服器指定的 IP 位址。

一開始，先啟動光碟的「LevelOne 裝置搜尋」(LevelOne Device Search) 工具，然後依序執行安裝作業：

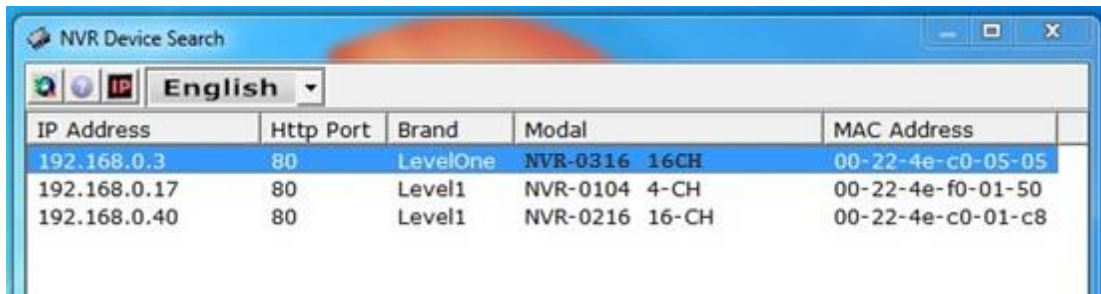

安裝完成之後，請勾選「啟動應用程式」(Launch the program)，然後按下「結束」(Finish)：

搜尋作業會自動啟動，並出現進行狀態畫面：

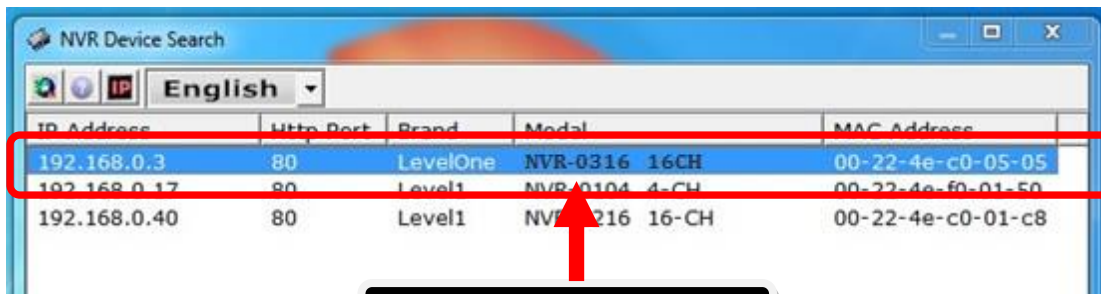

電腦會顯示網路影像錄影機的安裝位置和其 IP 位址：

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

點兩下網路影像錄影機，搜尋程式會透過預設瀏覽器自動讀取網路影像錄影機的線上管理頁面。

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Double-click

電腦會要求您輸入網路影像錄影機的使用者名稱和密碼。使用者名稱預設為「root」，預設密碼也是「root」，輸入完成後，請按下「確認」(OK) 按鈕登入系統頁面。

利用預設 IP 位址連接網路影像錄影機

網路影像錄影機的出廠預設值為靜態 IP 「192.168.101.50」。不過，此預設值只適用於網路沒有任何 DHCP 伺服器的情況。設定之後，網路影像錄影機會啟動 DHCP 伺服器功能，並充當網路的 DHCP 伺服器。

若要連接網路影像伺服器，請選擇支援跳線功能的 CAT5 乙太網路線直接連結至網路影像伺服器。接著，在瀏覽器輸入 IP 位址即可完成網路影像伺服器的連結。

同樣的，您也必須輸入使用者名稱和密碼。請輸入預設使用者名稱「root」和預設密碼「root」，然後按下「確認」(OK) 按鈕即可登入系統頁面。

新增攝影機

自動搜尋

1. 按下「搜尋」(Search) 按鈕執行攝影機搜尋。

Click here to search camera:

Search

* You may skip this step and add camera manually by entering camera's setting in the "Camera Information" section

Установите кабель SATA на жестком диске.

Установите кронштейны для жесткого диска

Закрепите кронштейны для жестких дисков в системе винтами.

Подключение видеорегистратора NVR

Доступны различные способы подключения видеорегистратора NVR, и ниже предложены методы для различной конфигурации сети.

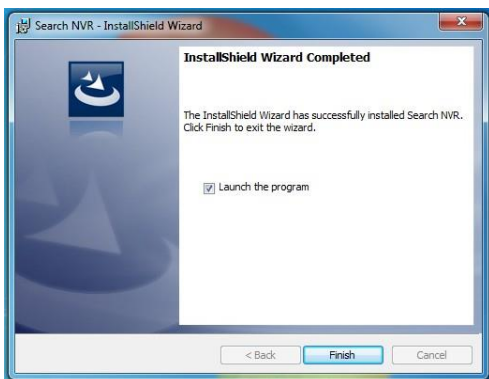

Использование служебной программы LevelOne Device Search

Если видеорегистратор NVR установлен в корпоративной или локальной сети, где уже есть DHCP-сервер, запустите служебную программу **LevelOne Device Search** (Поиск устройств LevelOne) с компьютера, находящегося в этой же сети и найдите видеорегистратор NVR по его IP-адресу, присвоенному DHCP-сервером верхнего уровня.

Для начала процедуры запустите служебную программу LevelOne Device Search с компакт-диска и перейдите к установке.

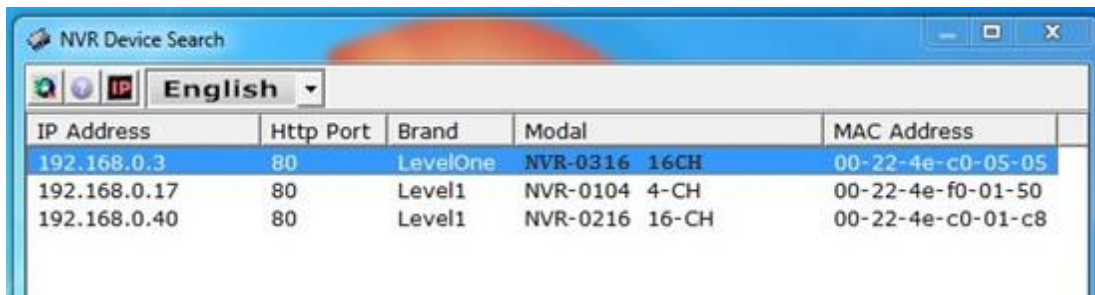

После выполнения установки установите флажок «Launch the program» и нажмите кнопку «Finish» (Готово).

Поиск должен начаться автоматически, и его состояние должно отобразиться на экране.

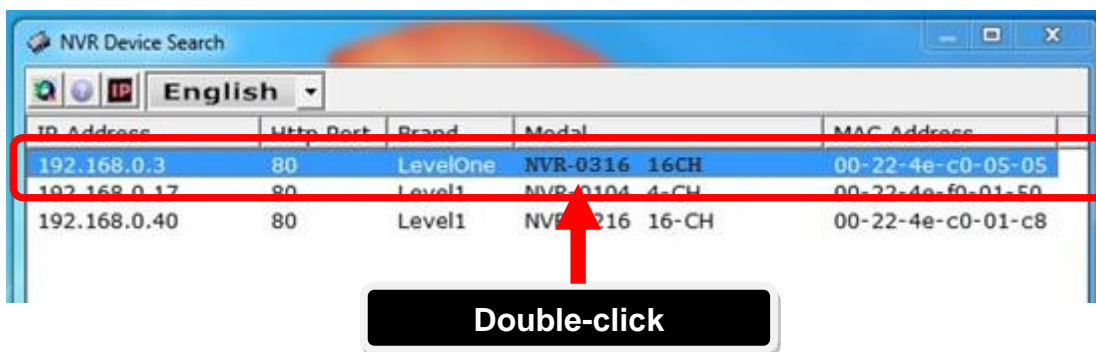

Должен быть найден видеореги­стратор NVR, и должен отобразиться его IP-адрес:

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Дважды щелкните строку видеореги­стратора NVR, и программа поиска должна автоматически открыть веб-страницу администрирования видеореги­стратора NVR в используемом по умолчанию браузере.

Должен отобразиться запрос на ввод имени пользователя и пароля видеореги­стратора NVR. Введите стандартные имя пользователя «root» и пароль «root» и затем нажмите кнопку «OK» для входа в систему.

Доступ к видеорегистратору NVR посредством стандартного IP-адреса

Видеорегистратор NVR поставляется с предварительно настроенным статическим IP-адресом «192.168.101.50». Однако он используется только в том случае, если в сети нет DHCP-сервера. Видеорегистратор NVR включит собственную функцию DHCP-сервера и будет работать в сети как DHCP-сервер.

Для подключения к видеорегистратору NVR подключите компьютер непосредственно к видеорегистратору NVR с помощью Ethernet-кабеля категории CAT5. Просто откройте веб-страницу видеорегистратора NVR из веб-браузера посредством IP-адреса видеорегистратора.

Должен отобразиться запрос на ввод имени пользователя и пароля. Введите стандартные имя пользователя «root» и пароль «root» и затем нажмите кнопку «OK» для входа в систему

Добавление камеры

Автоматический поиск

1. Нажмите кнопку «Search» (Поиск) для выполнения поиска камеры.

Click here to search camera:

Search

* You may skip this step and add camera manually by entering camera's setting in the "Camera Information" section

Add New Channel:

Channel ID: 4

Channel Name: cam4

Zainstaluj kabel SATA w HDD

Instalacja wsporników HDD

Zamocuj wsporniki HDD śrubami w systemie

5. Załóż z powrotem górną część obudowy i przymocuj ją do dolnej części obudowy.

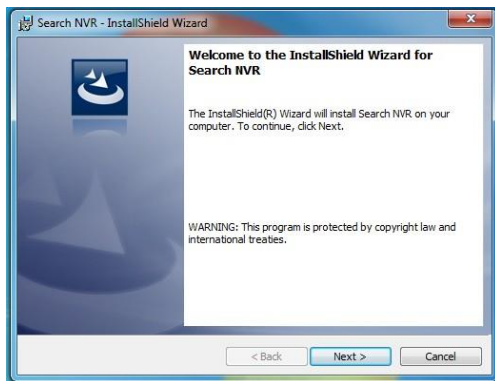

Podłącz do NVR

Dostępne są różne sposoby podłączenia NVR, a poniżej zamieszczono sugerowane metody dla różnych konfiguracji sieci:

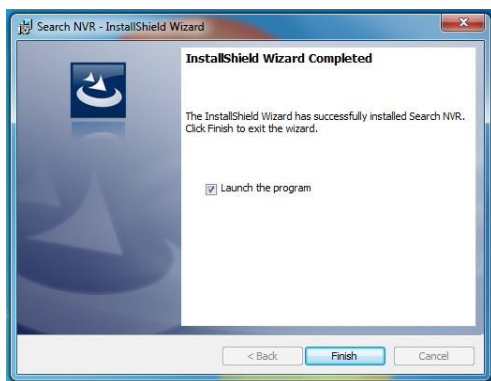

Używanie programu narzędziowego LevelOne Device Search

Jeśli NVR zostanie umieszczony w sieci korporacji lub w sieci lokalnej, w której znajduje się już serwer DHCP należy uruchomić w komputerze program narzędziowy “**LevelOne Device Search**”, który znajduje się w tej samej sieci i zlokalizować NVR z adresem IP, przypisanym przez głównego poziomu serwer DHCP.

W celu rozpoczęcia, uruchom z płyty CD program narzędziowy “Device Search” i wykonaj instalację:

Po zakończeniu instalacji, sprawdź opcję “Launch the program” i kliknij “Zakończ”.

Wyszukiwanie powinno zacząć się automatycznie i powinien wyświetlić się jego stan.

NVR należy zlokalizować i powinien zostać wyświetlony jego adres.

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Kliknij dwukrotnie NVR, po czym program wyszukiwania powinien automatycznie uzyskać dostęp do administracyjnej strony sieci web NVR z domyślnej przeglądarki.

IP Address	Http Port	Brand	Model	MAC Address
192.168.0.3	80	LevelOne	NVR-0316 16CH	00-22-4e-c0-05-05
192.168.0.17	80	Level1	NVR-0104 4-CH	00-22-4e-f0-01-50
192.168.0.40	80	Level1	NVR-0216 16-CH	00-22-4e-c0-01-c8

Double-click

Powinno pojawić się polecenie wprowadzenia nazwy użytkownika i hasła NVR. Wprowadź domyślną nazwę użytkownika **“root”** i hasło **“root”**, a następnie kliknij **“OK”** w celu przejścia do systemu.

Dostęp NVR z jego domyślnym adresem IP

NVR jest dostarczany ze wstępnie skonfigurowanym, statycznym adresem IP "192.168.101.50". Jednakże, jest on używany wyłącznie przy braku serwera DHCP w sieci. NVR włączy funkcję serwera DHCP i będzie działać jako serwer DHCP w sieci.

W celu połączenia z NVR, podłącz komputer PC bezpośrednio do NVR kablem skrosowanym Ethernet CAT5. Połącz się z NVR z przeglądarki sieci web, poprzez jej adres IP.

Ponownie powinno pojawić się polecenie wprowadzenia nazwy użytkownika i hasła. Wprowadź domyślną nazwę użytkownika "root" i hasło "root", a następnie kliknij "OK" w celu przejścia do systemu.

Dodaj kamerę

Automatyczne wyszukiwanie

1. Kliknij przycisk "Szukaj", aby wyszukać kamerę.

Click here to search camera:

Search

* You may skip this step and add camera manually by entering camera's setting in the "Camera Information" section

Add New Channel:	
Channel ID:	4
Channel Name:	cam4
IP Address:

5. W części “Informacje o kamerze” powinna być wyświetlona nazwa użytkownika i hasło. Wprowadź nazwę użytkownika i wybierz kanał ID oraz nazwę kamery.

Add New Channel:

Channel ID:

Channel Name:

IP Address:

User Name:

Password:

HTTP Port:

Once you fill out above information, click "Detect" to retrieve camera setting

6. Kliknij "Wykryj", aby ustanowić połączenie pomiędzy nagrywarką i kamerą. Po pomyślnym nawiązaniu połączenia, powinny zostać rozesłane i wyświetlone pokazane poniżej informacje.

Once you fill out above information, click "Detect" to retrieve camera setting

Additional Camera Information

Video Port:

Format:

Resolution:

Frame Rate:

Bitrate Mode:

Bitrate:

Record: Continuous

Record Audio: Record audio

7. Wyreguluj zgodnie z wymaganiem format video, częstotliwość przesyłania klatek, rozdzielczość lub szybkość przesyłania danych...itd., a następnie kliknij "Dodaj", aby zakończyć dodawanie kamery.

Once you fill out above information, click "Detect" to retrieve camera setting

Additional Camera Information

Video Port:

Format:

Resolution:

Frame Rate:

Bitrate Mode:

Bitrate:

Record: Continuous

Record Audio: Record audio

Dodaj kamerę ręcznie

Wykonaj opisaną powyżej instrukcję, ale zamiast użycia funkcji "Szukaj", ręcznie wprowadź adres IP kamery i informacje poufne w polu "Informacje kamery", a następnie wykonaj czynności 6 ~ 7 opisane powyżej.

Add New Channel:

Channel ID:

Channel Name:

IP Address:

User Name:

Password:

HTTP Port:

Once you fill out above information, click "Detect" to retrieve camera setting
