NVR Management Software

Quick Installation Guide

v1.7.0

Table of Contents

User Interface Overview

CMS UI Overview
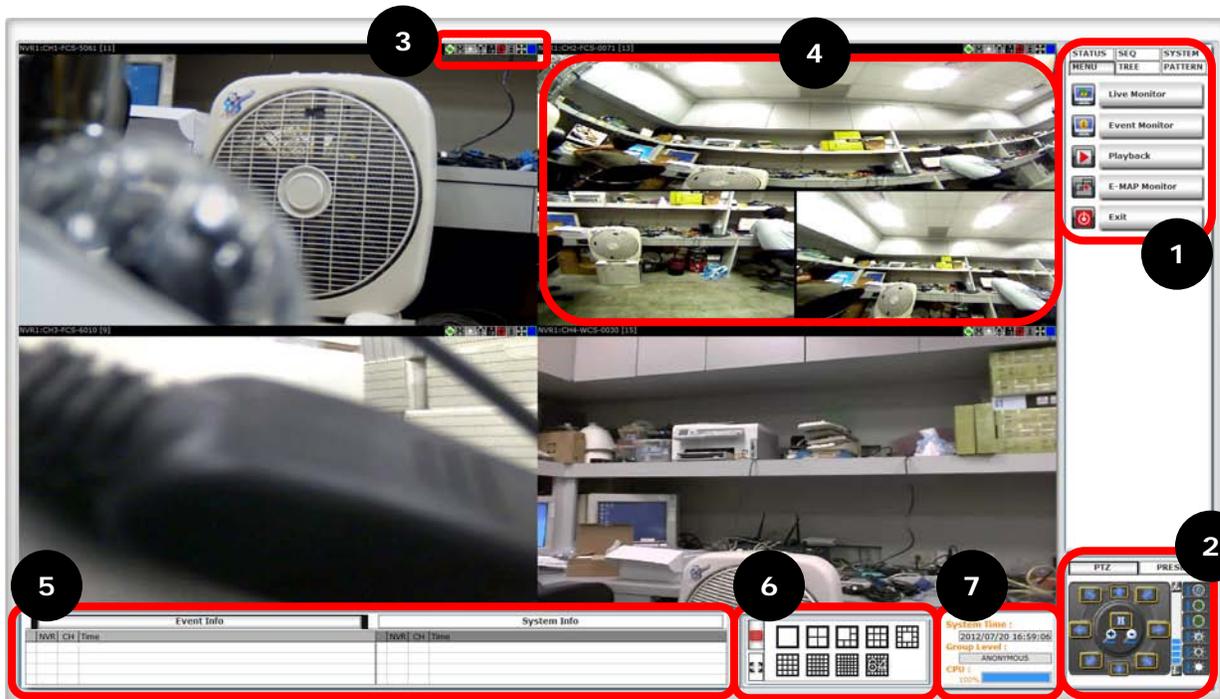

1. Menu Bar: This is where you can access all functions of the software. Camera list and device status information are also available from the menu bar.

2. PTZ Control Panel: This is where you can pan, tilt, zoom the selected PTZ camera. Functions such as preset point navigation and auto pan can also be accessed here.

3. Quick Access: Each video window comes with quick access buttons, which allows you to quickly take certain actions to the video you are viewing.

4. Live Video: This is where all the videos are displayed. You can decide what channels' videos to be displayed here by dragging cameras from the side menu bar and dropping them anywhere in this section.

5. System/Event Logs: System status such as motion detection, functions that were accessed or settings that were altered are displayed here.

6. Video Window Management: You can change the video split windows with you desire depends on how many videos you wish to view at a time.

7. System Info: It provides information of current system time, who is currently logged in and the CPU usage that the software is currently consuming.

Installation

Begin Installation
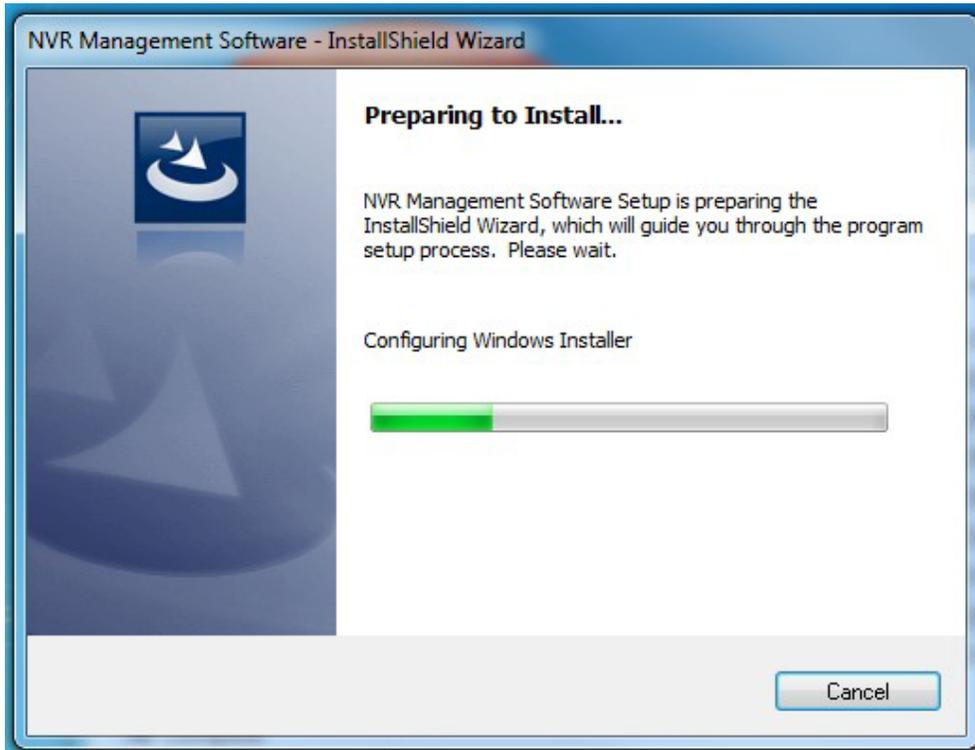

The installation should launch as soon as you insert the CD. If not, simply double-click on your CD-ROM drive icon in "My Computer" and locate the NVR Management Software folder and launch the installer. Once the installer is launched, it should start by checking the compatibility with the operating system you are running this installation on.

Attention for Windows Vista, Windows 7, Windows 2008 Server users
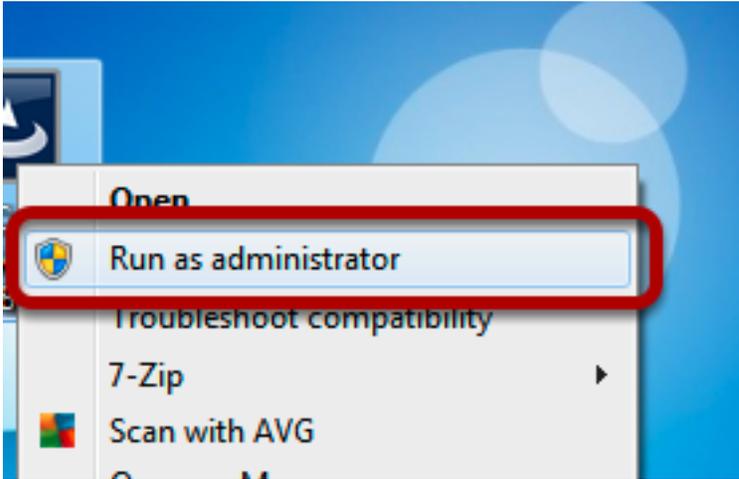

If you are installing the software in Windows Vista, Windows 7, or Windows 2008 Server, please make sure the software is installed with administrator privilege.
To do so, right-click on the installation file and select "Run as administrator" option from the drop-down menu, or simply log into Windows with the administrator account.
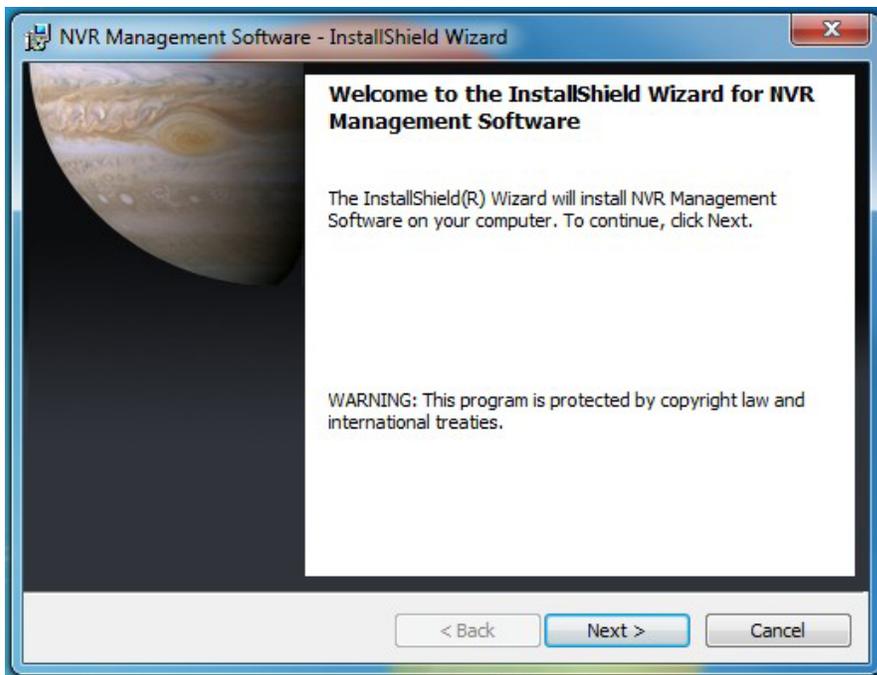

Once the compatibility check is passed, you can begin the installation by clicking "next".
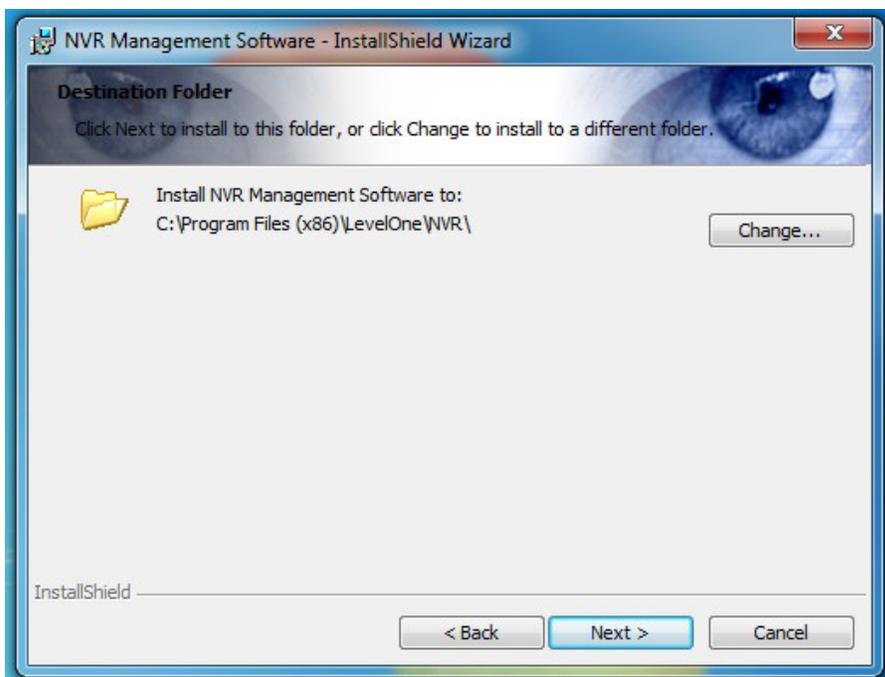

The installer will install the program in a pre-defined directory. You can accept the default and click "Next" to proceed with the installation.
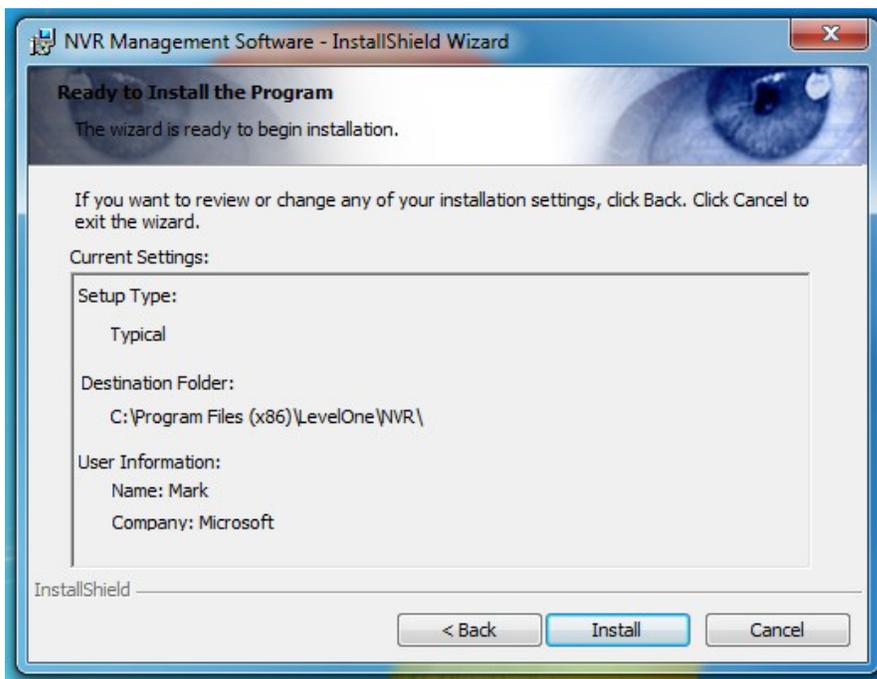

The installer will confirm the installation directory one more time. Click "Install" to begin installation, or click "Back" to change the installation directory.

The installer will display the installation process.

Once the installation is complete, click "Finish" to exit out the installer.

Launch the Program

Start NVR Management Software

Run Setup Wizard First
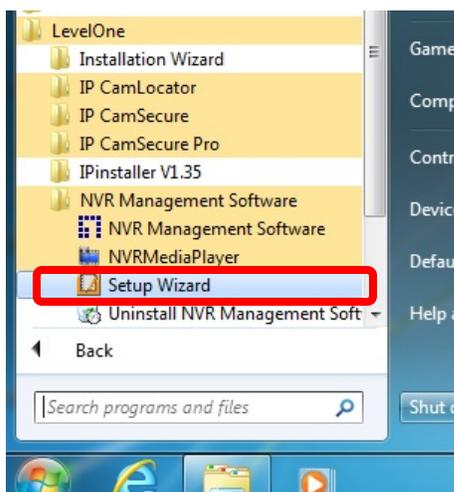

You should run the "Setup Wizard" before launching the CMS software. The Setup Wizard is a separate program which you can launch it the same way you launch the CMS software (from Start menu). The purpose of the Setup Wizard is to help users with certain preliminary settings in order for the program to work with the NVRs.

Start it from the "Start" menu
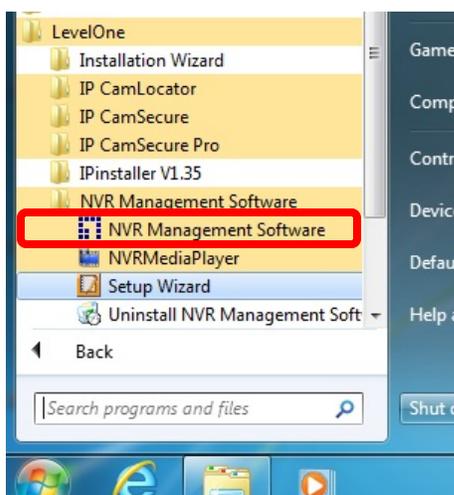

Simply go to "Start" >> "All Programs" >> "LevelOne" >> "NVR Management Software" >> "NVR Management Software"

Start it from the desktop

The program automatically creates a shortcut icon on your desktop after it's successfully installed. Simply double-click the icon to launch the program.

Attention for Windows Vista, Windows 7, or Windows 2008 Server users

right-click
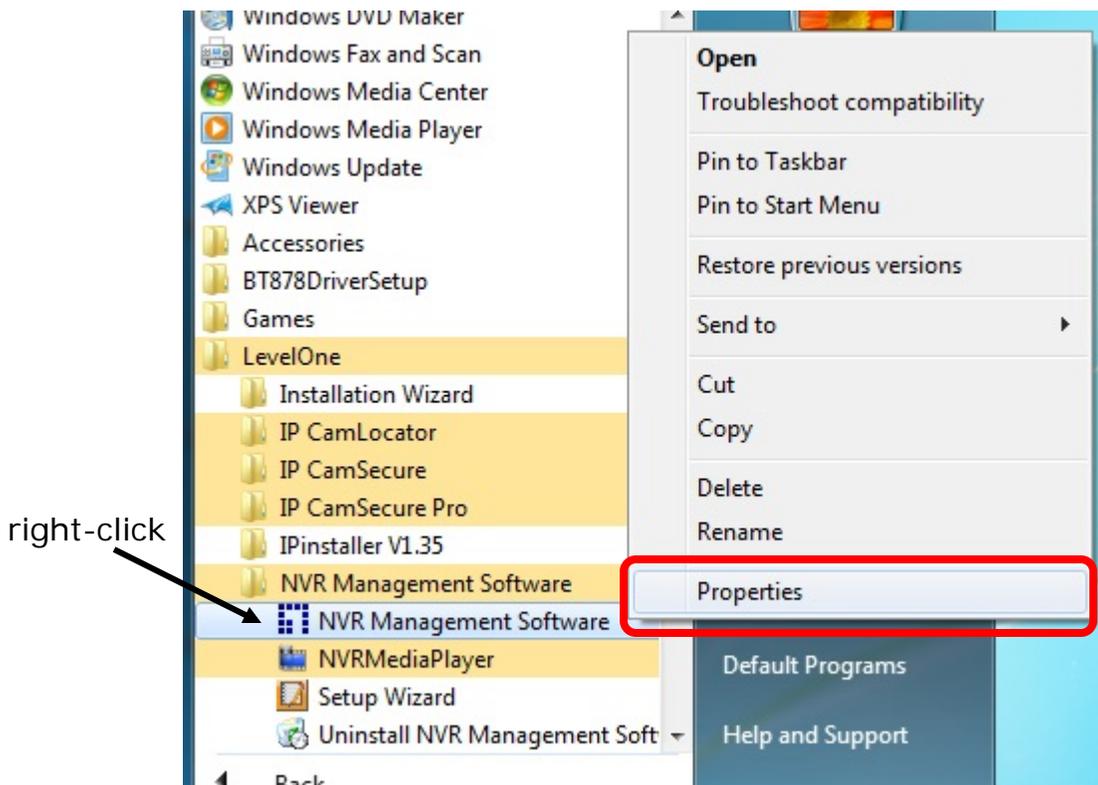

If you are running the CMS software in Windows Vista, Windows 7, or Windows 2008 server, please make sure the "Setup Wizard" and the main program are launched with the administrator privilege.
To do so, go to "Start" >> "All Programs" >> "LevelOne" >> "NVR Management Software", right-click on the "Setup Wizard" or "NVR Management Software" (Main program) and select "Properties" from the drop-down menu.
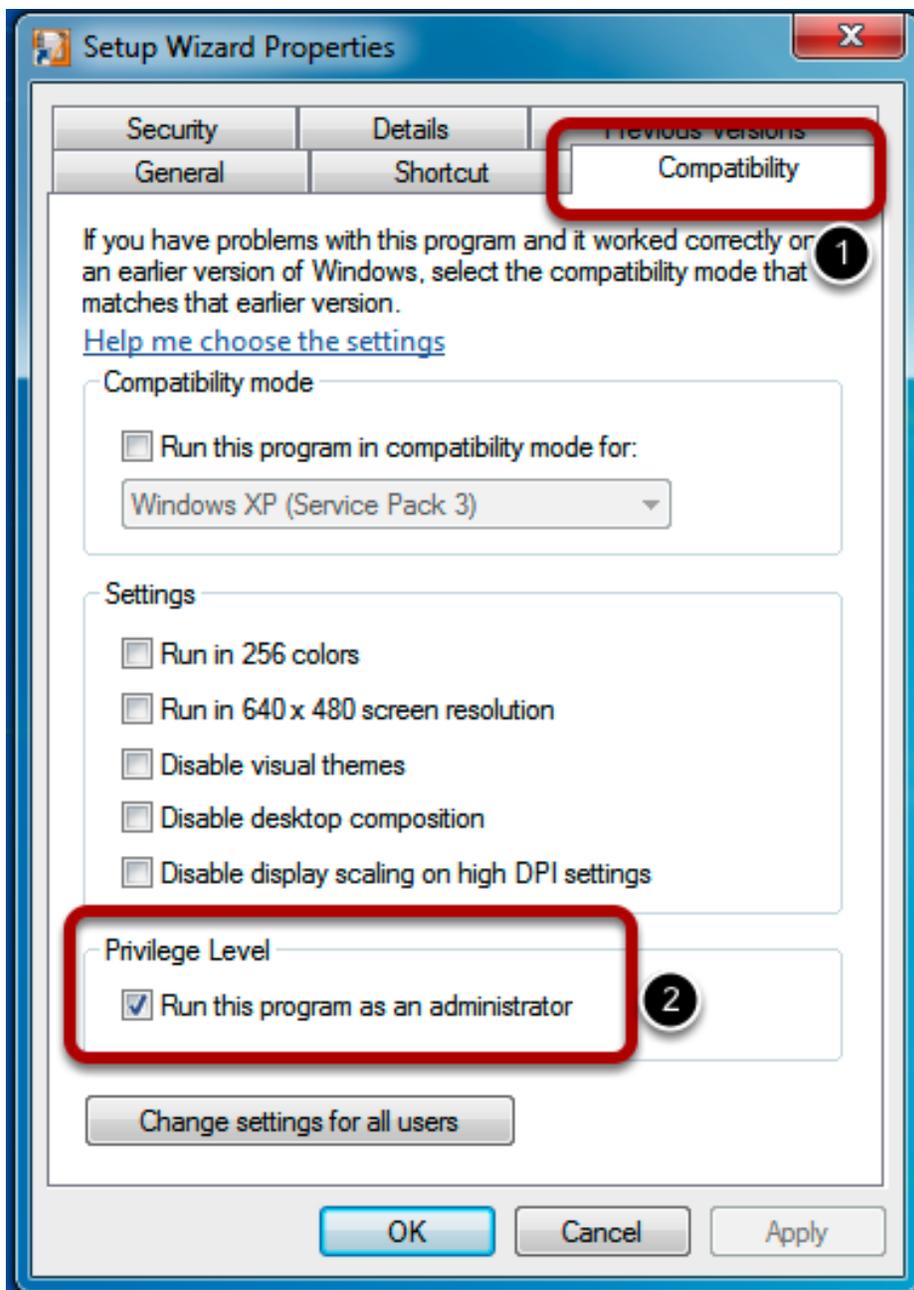

The Properties dialog should be displayed. Go to "Compatibility" and check the "Run this program as an administrator" option.

Installing the CMS on Windows Vista/7:

Due to the UAC (User Access Control) function introduced in Windows Vista/7, it's required the software to be installed with administrator privilege. To do so, launch the instasller by right-clicking the setup file and choose "Run as Administrator".
