## Quick Guide

### Step 1: Connection to Power over Ethernet Switch

- Connect one of the Ethernet Switch port with PoE power supply to the **PoE IN** port of POR-0102 as the following connection.
- The LED indicators "**POWER**" and "**IN**" will turn on indicating the PoE and Ethernet connection.
- The LED indicators "**IN**" will flash to indicate Ethernet data activity.

#### PoE Switch

## Step 2: Connection to PoE PD

- D. Connect the **PoE OUT1 & OUT2** port of PR102 to power up the PD device as the following connection.
- E. The LED indicators “**OUT1**” will turn on indicating the PoE and Ethernet connection.
- F. The LED indicators “**OUT1**” will flash to indicate Ethernet data activity.
- G. The LED indicators “**OUT2**” will turn on indicating the PoE and Ethernet connection.
- H. The LED indicators “**OUT2**” will flash to indicate Ethernet data activity.

**\*\* Note:** If the Ethernet cable is not standard CAT5 cable, the POR-0102 may be working for shorter length than 100 meter.
